

Intro to IPUMS NHGIS

Geographic U.S. Census Data from 1790 to the Present

Jonathan Schroeder
Dave Van Riper

IPUMS Webinar Series – November 9, 2018

UNIVERSITY OF MINNESOTA

IPUMS

Webinar plan

1. What is IPUMS NHGIS?
2. Basic walkthrough
3. How does NHGIS differ from alternatives?
4. Highlights: block data, time series tables
5. Q&A / Guided website tour

IPUMS

[ABOUT](#) |
 [SUPPORT](#) |
 [PROJECTS](#) |
 [BIBLIOGRAPHY](#) |
 [BLOG](#)

IPUMS provides census and survey data from around the world integrated across time and space. IPUMS integration and documentation makes it easy to study change, conduct comparative research, merge information across data types, and analyze individuals within family and community context. Data and services available free of charge.

U.S. Census and American Community Survey microdata from 1850 to the present.

[VISIT SITE](#)

Current Population Survey microdata including basic monthly surveys and supplements from 1962 to the present.

[VISIT SITE](#)

Census microdata covering 82 countries from 1960 to the present. [IPUMS NAPP](#) offers microdata from the 19th and early 20th centuries.

[VISIT SITE](#)

Demographic and Health Surveys integrated for analysis across time and space from 1980 to the present.

[VISIT SITE](#)

Tabular U.S. Census data and GIS boundary files from 1790 to the present.

[VISIT SITE](#)

Integrated data on population and the environment from 1960 to the present.

[VISIT SITE](#)

Historical and contemporary time use data from 1965 to the present.

Health survey data from the National Health Interview Survey from the 1960s to the present.

Survey data on the science and engineering workforce in the U.S. from 1993 to the present.

RESEARCH AWARDS

Submissions for IPUMS Research Award are now closed.

[BROWSE PREVIOUS AWARD WINNERS](#)

SUPPORT IPUMS

Join Data

Join lets you append additional data to this layer's attribute table so you can, for example, symbolize the layer's features using this data.

What do you want to join to this layer?

Join attributes from a table

- Choose the field in this layer that the join will be based on:
GISJOIN
- Choose the table to join to this layer, or load the table from disk:
nhgis0620_ds76_1940_tract.csv
 Show the attribute tables of layers in this list
- Choose the field in the table to base the join on:
GISJOIN
STATE
COUNTY
PRETRACTA
POSTTRACTA
AREANAME

Keep only matching records
If a record in the target table doesn't have a match in the join table, that record is removed from the resulting target table.

Validate Join

Alternative: American FactFinder

The screenshot shows the American FactFinder website in a browser window. The browser address bar displays the URL: factfinder.census.gov/faces/nav/jsf/pages/searchresults.xhtml?refresh=t. The website header includes the United States Census Bureau logo and the text "AMERICAN FactFinder". A navigation menu contains links for MAIN, COMMUNITY FACTS, GUIDED SEARCH, ADVANCED SEARCH (highlighted), and DOWNLOAD CENTER. A search instruction reads: "Search - Use the options on the left (topics, geographies, ...) to narrow your search results".

Your Selections
"Your Selections" is empty
load search | save search

Search using the options below:

- Topics** (age, income, year, dataset, ...)
- Geographies** (states, counties, places, ...)
- Race and Ethnic Groups** (race, ancestry, tribe)
- Industry Codes** (NAICS industry, ...)
- EEO Occupation Codes** (executives, analysts, ...)

To search for tables and other files in American FactFinder:

- 1 Enter search terms and an optional geography and click GO

topic or table name state, county or place (optional) GO ?

topics race/ancestry industries occupations

-- or --

Select from **Topics**, **Race and Ethnic Groups**, **Industry Codes**, **EEO Occupation Codes**.

- these are added to "Your Selections"
- the Search Results are updated

- 2 Next, select **Geographies** (states, counties, cities, towns, etc.)

- these are added to "Your Selections"
- the Search Results are updated

- 3 Select one or more Search Results and click **View**

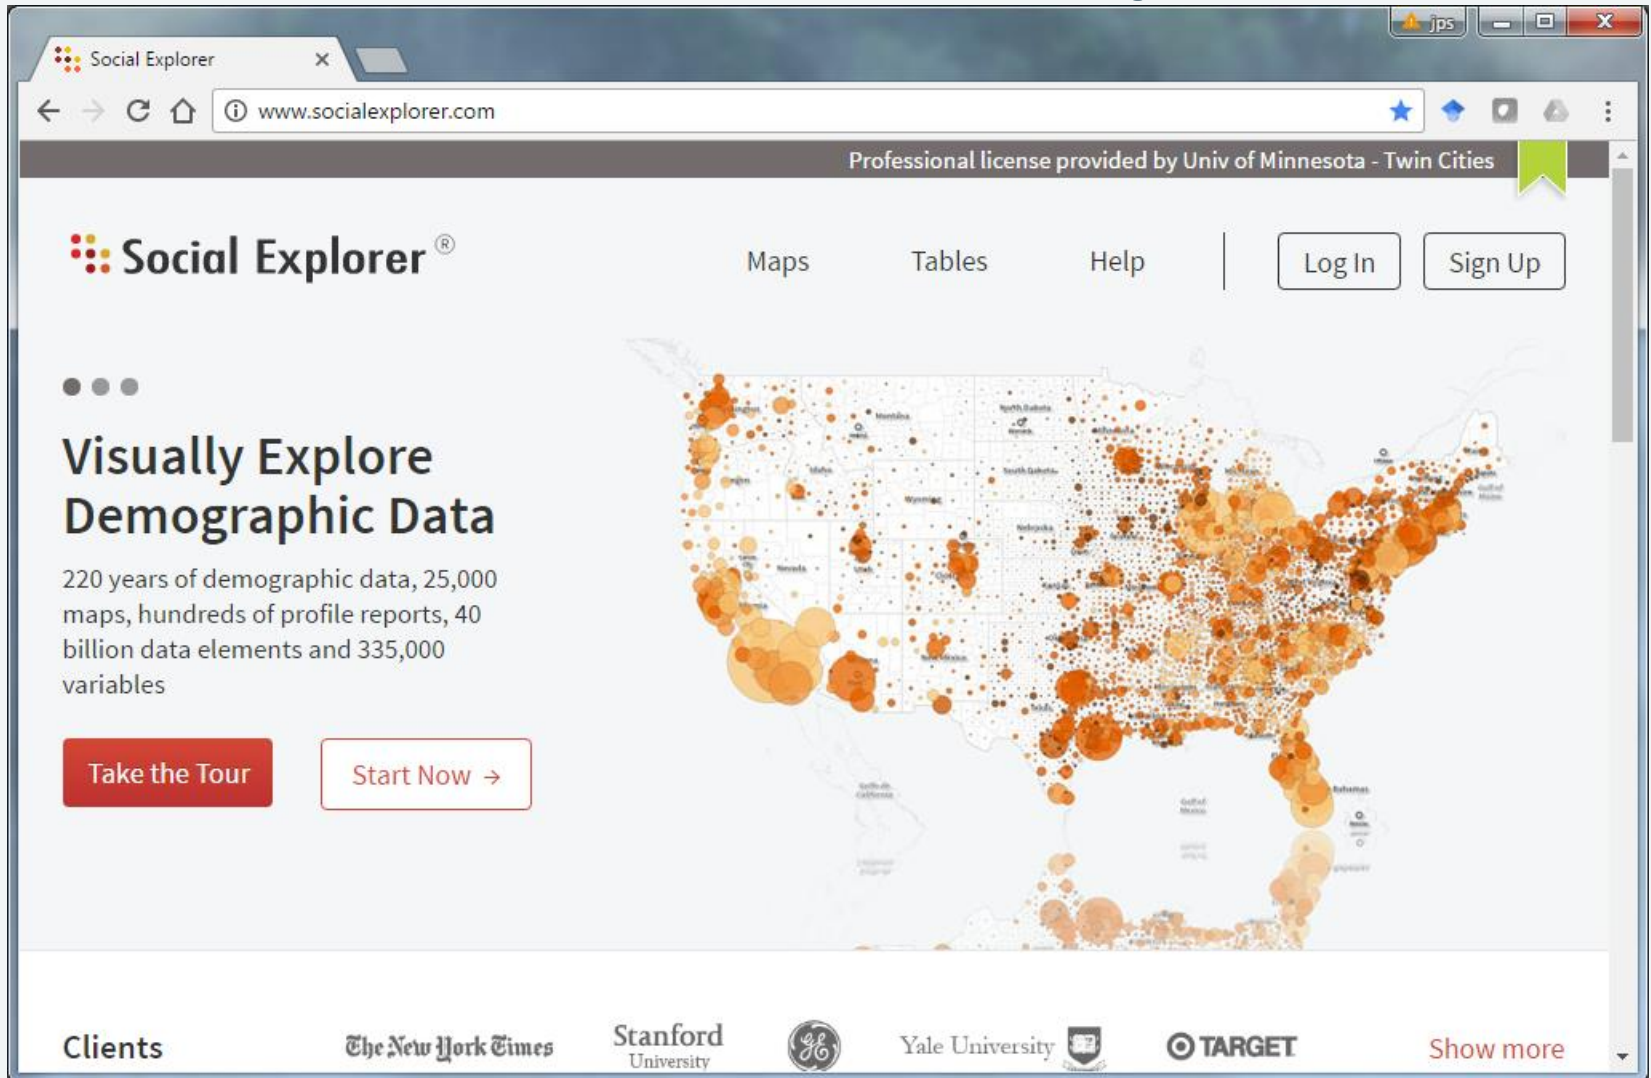

American FactFinder

- Data since 2000 only
- Tables here, boundary files elsewhere
- Limited extents for small-area data
 - Tracts by state
 - Block groups by county
- No block data
- Download only one table per file

Alternative: data.census.gov

The screenshot shows a web browser window with the address bar displaying `https://data.census.gov/cedsci/search`. A notice at the top states: "This is a preview of the Census Bureau's new data exploration platform. The data presented here are test data and should not be used for purposes beyond evaluating the functionality of the platform. For official Census data, please continue to use our data resources at census.gov/data.html." Below this is the United States Census Bureau logo. The main heading reads "Explore Census Data". A subtext says: "The Census Bureau serves as the leading source of quality data about the nation's people and economy." At the bottom left is a search bar with the placeholder text "I'm looking for..." and a magnifying glass icon. On the right side, there is an illustration of a desktop monitor, a laptop, and a smartphone, each displaying different data visualizations like maps and bar charts.

Alternative: Social Explorer

The screenshot shows the Social Explorer website in a browser window. The browser's address bar displays "www.socialexplorer.com". A navigation bar at the top right includes "Maps", "Tables", and "Help" links, along with "Log In" and "Sign Up" buttons. A banner at the top right states "Professional license provided by Univ of Minnesota - Twin Cities". The main content area features the Social Explorer logo and a large map of the United States. The map is populated with numerous orange circles of varying sizes, representing demographic data points across the country. To the left of the map, there is a heading "Visually Explore Demographic Data" and a sub-heading "220 years of demographic data, 25,000 maps, hundreds of profile reports, 40 billion data elements and 335,000 variables". Below this text are two buttons: "Take the Tour" and "Start Now →". At the bottom of the page, a "Clients" section lists logos for The New York Times, Stanford University, GE, Yale University, and TARGET, with a "Show more" link.

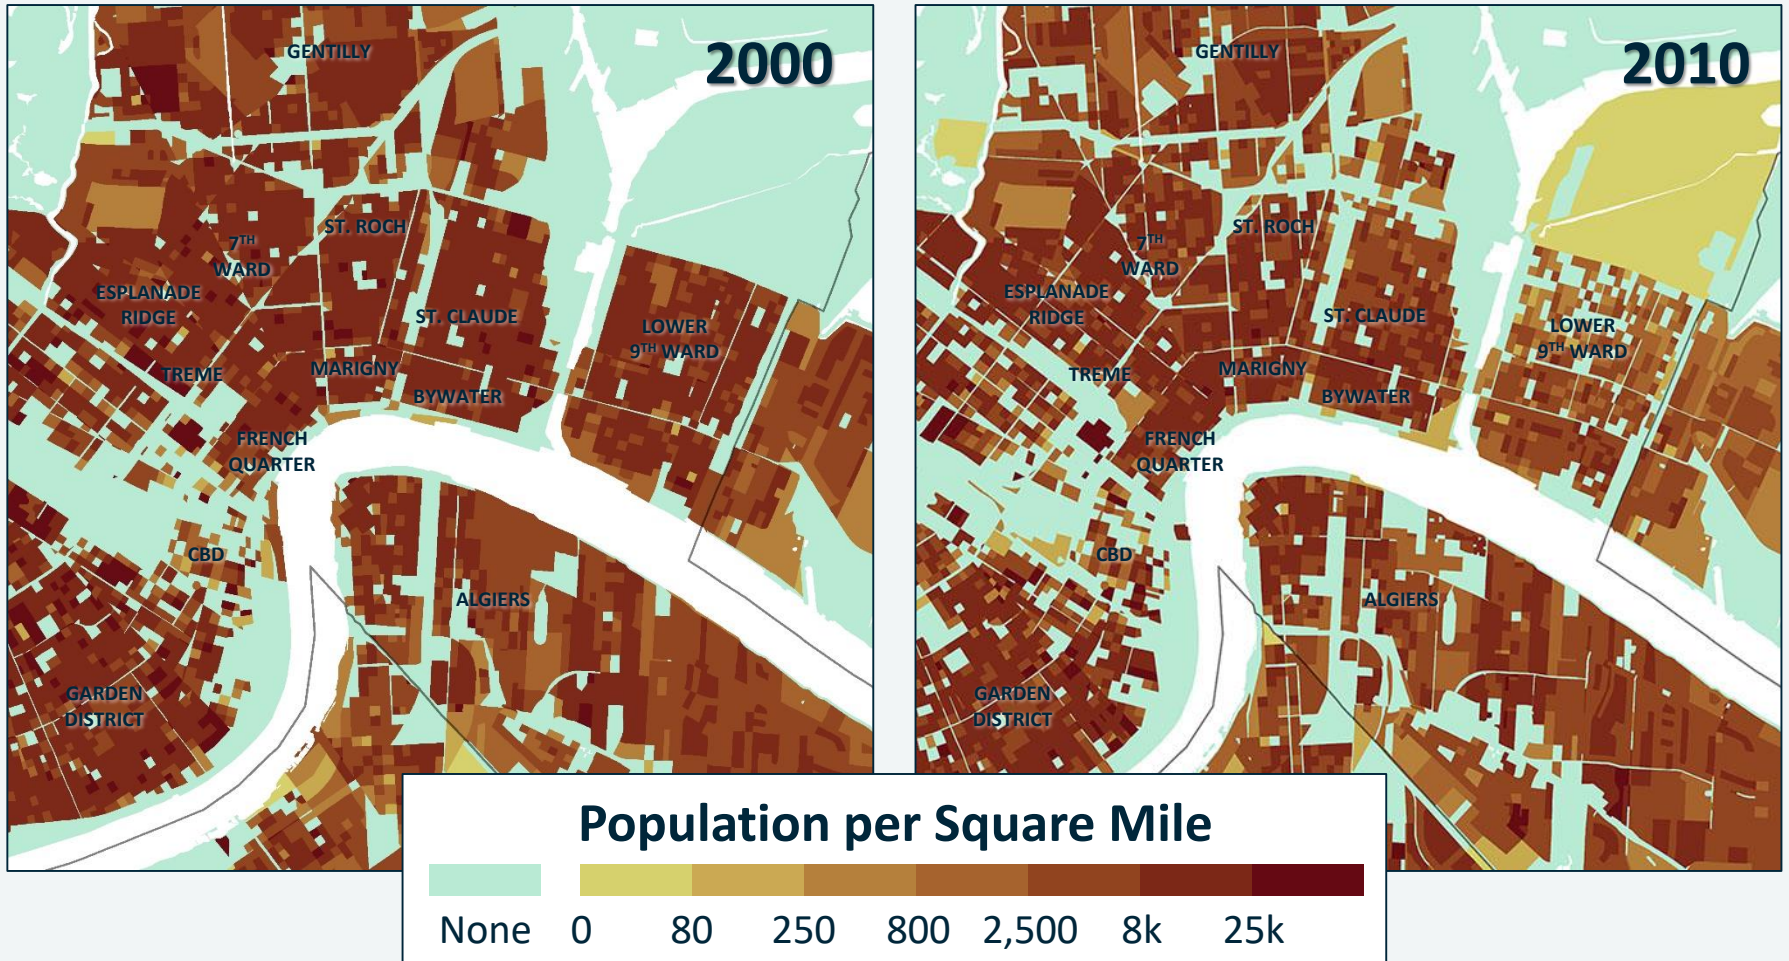

Social Explorer

- From 1790 through most recent ACS
- Online mapping + tables (view or download)
- Many unique sources:
 - U.S. religion, health, crime, Canada & UK ...
- No boundary files
- No Decennial Census Summary Files 2 or 4
- Requires license for full access

Unique to NHGIS

- Historical census tables *and* GIS files
- Universal data filtering & selection
 - All years, levels & data types accessible at once
- Nationwide extent for all levels
 - *Census block boundaries by state
- Historical vital statistics, agriculture, businesses, religious bodies...
- Complete 1970-2010 summary file data
- Time series tables
- **FREE**

Geographically standardized time series

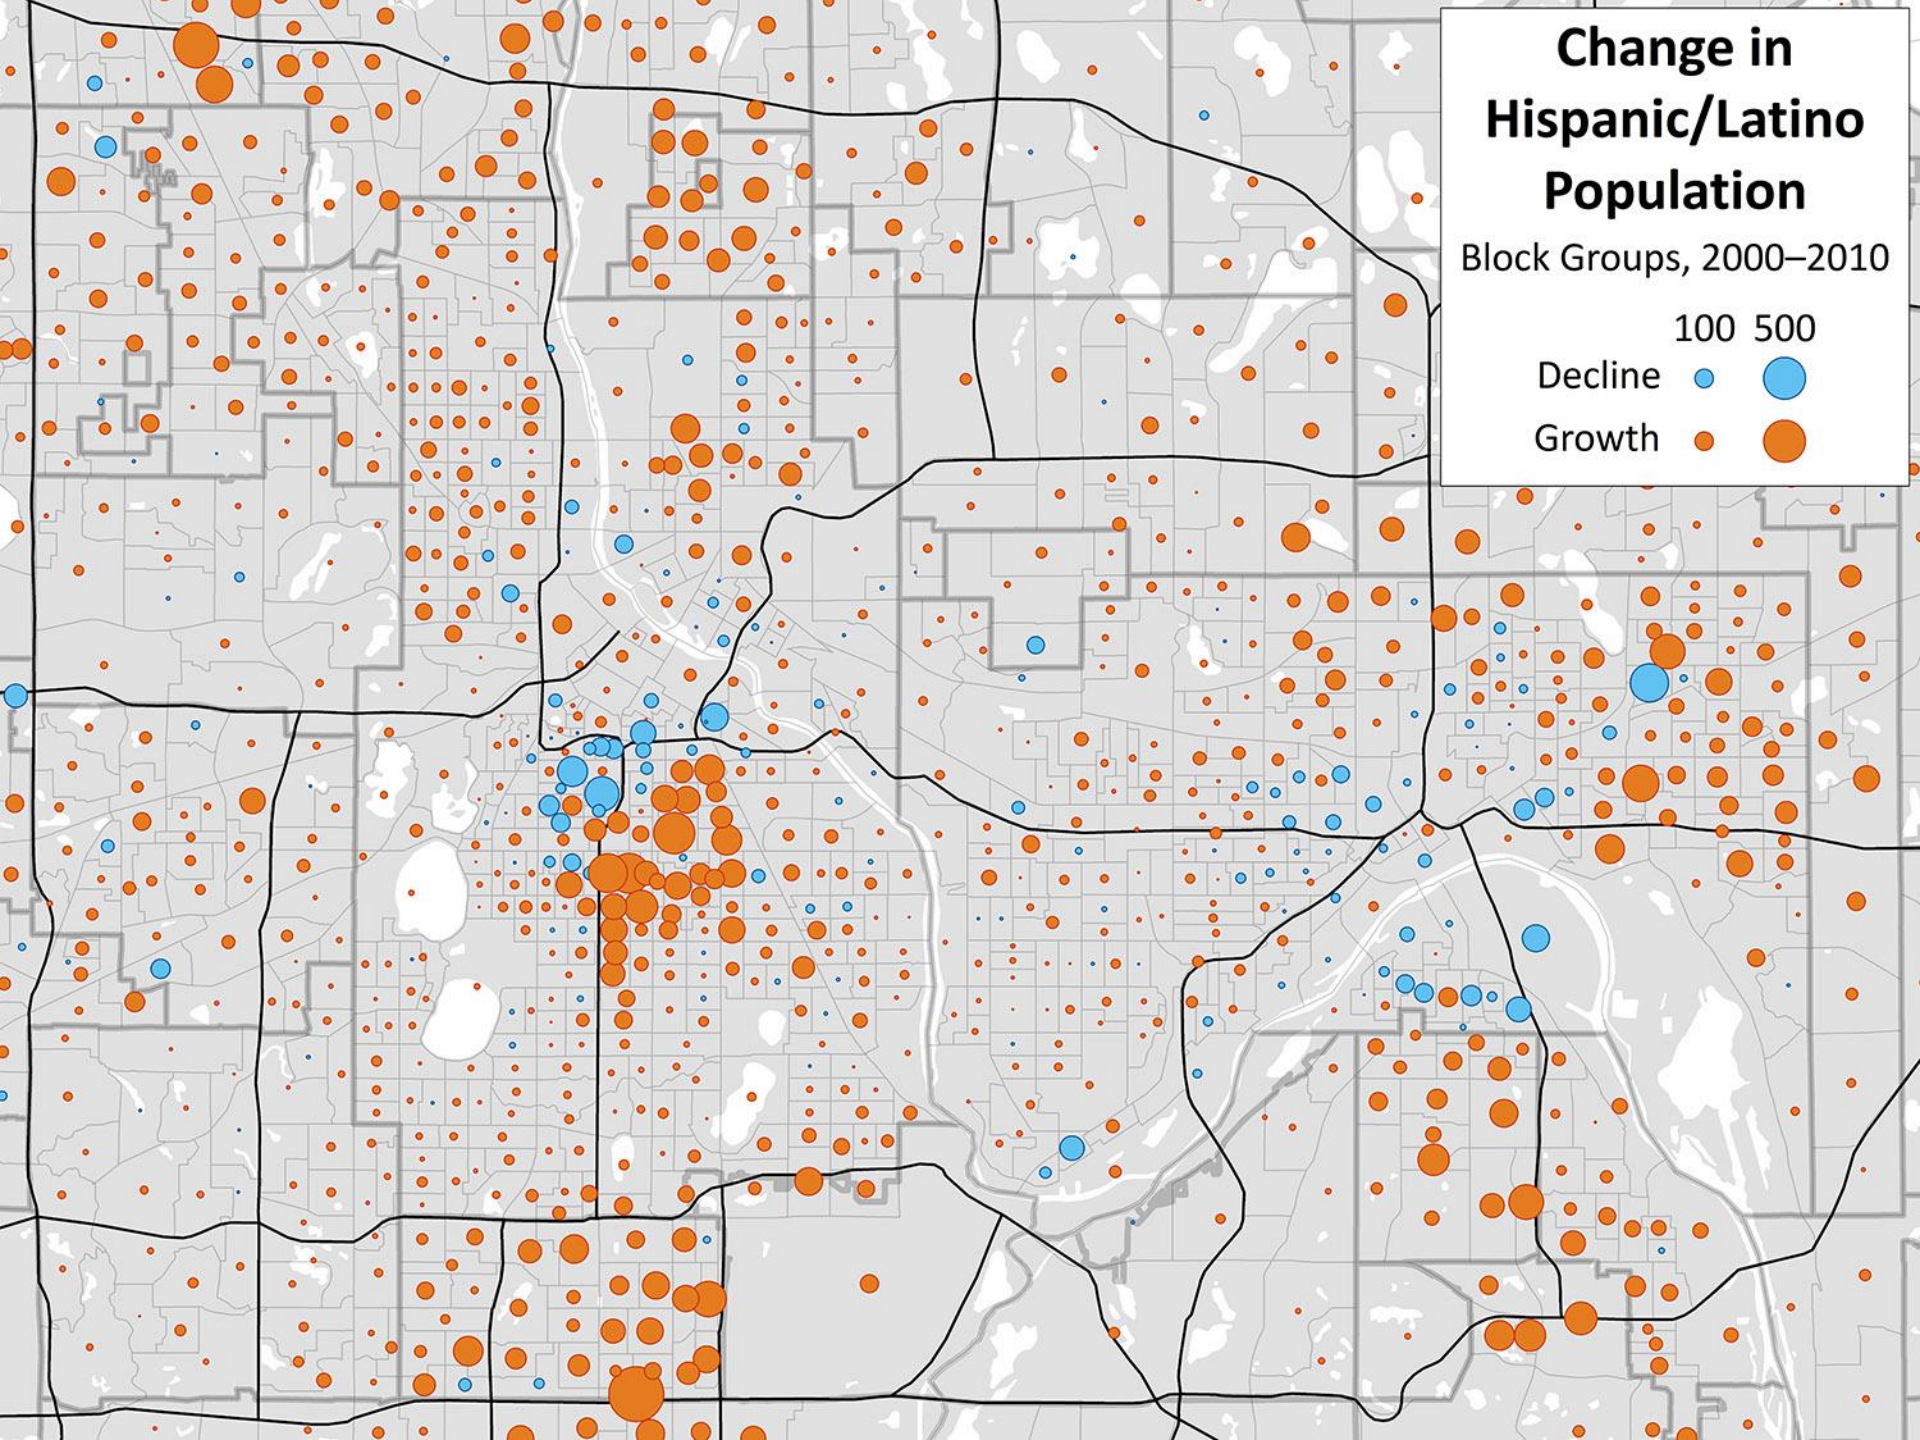

Change in Population Density
1990–2010, Persons / Sq. Mi.

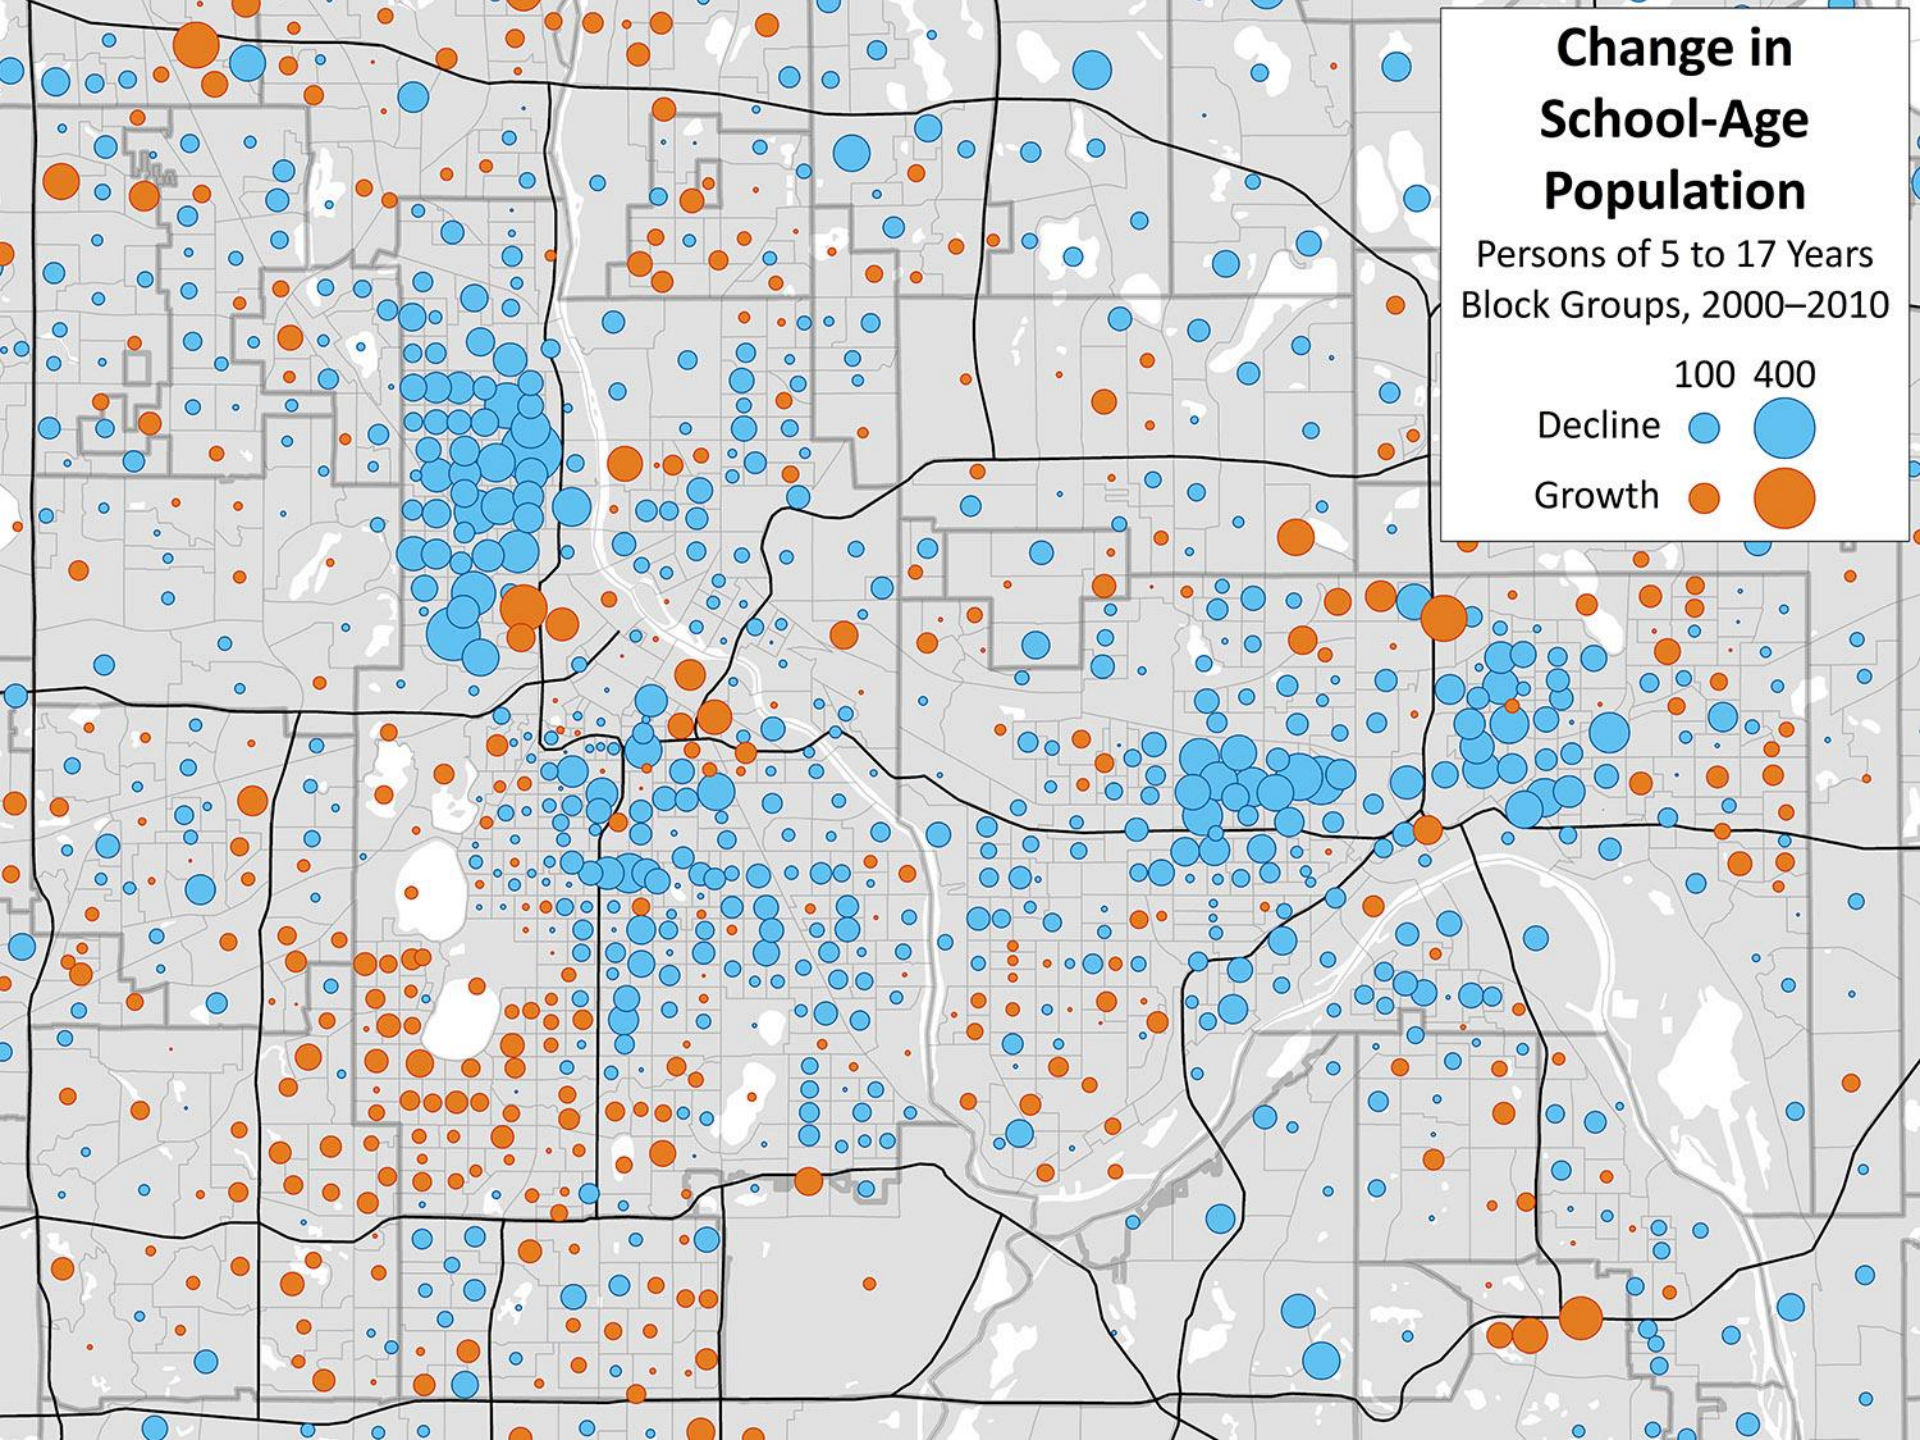

*Block
groups*

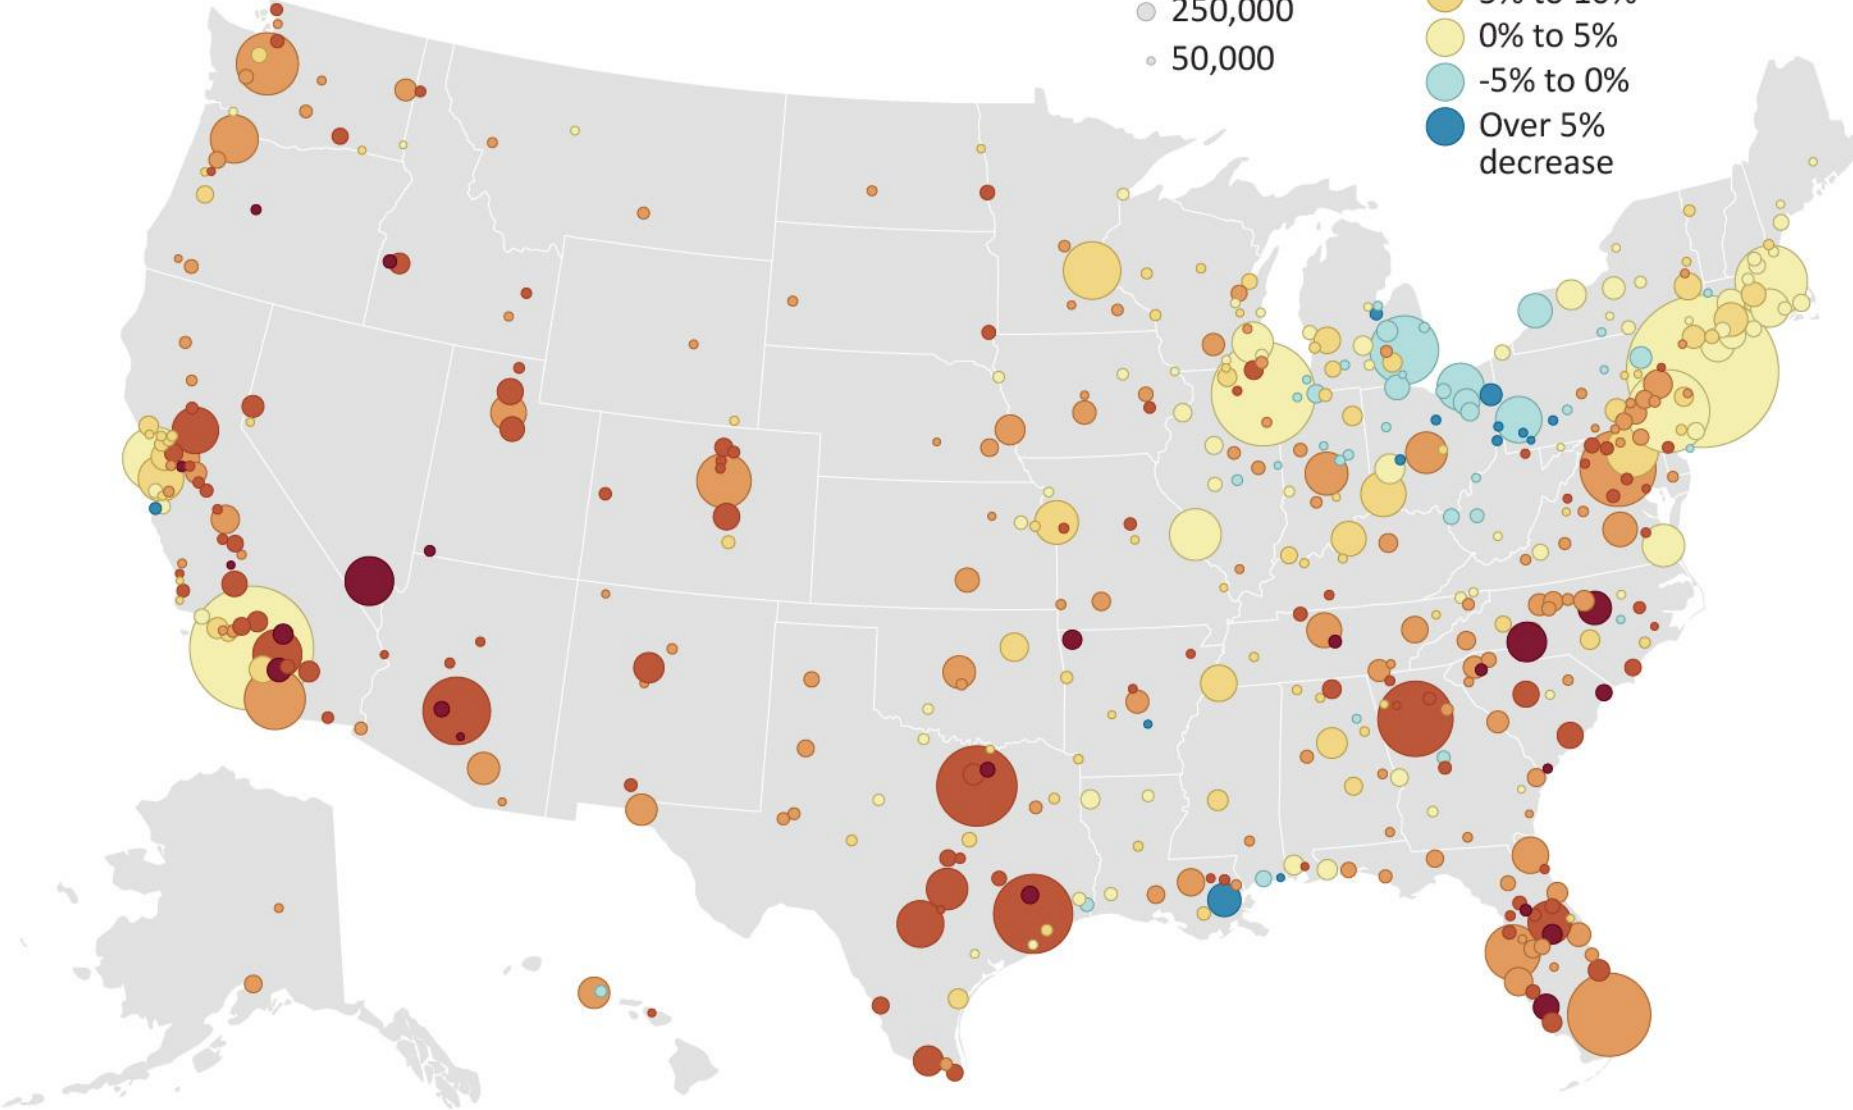

Change in Hispanic/Latino Population

Block Groups, 2000–2010

Population Change in Urbanized Areas 2000–2010

Geographically standardized time series

- 1990, 2000 & 2010 data for 2010 units
- 10 geographic levels:
 - states, counties, tracts, block groups,
 - county subdivisions, places,
 - congressional districts, CBSAs, urban areas, ZCTAs
- ~1,600 time series in 109 tables
- “Short-form” counts only
 - Race, ethnicity, age, sex, household size & relationships, housing occupancy & tenure
 - *Not* income, education, employment, ...

Nominally integrated time series

- ~5,700 time series in 271 tables
- 8 geographic levels:
nation, regions, divisions, states, counties, tracts,
county subdivisions, places
- Years mainly in 1970-2010 range
 - *Total Population* back to 1790 &
Persons by Sex back to 1820
 - “Long-form” tables use 2008-2012 ACS

Documentation at nhgis.org

2. *Geographically standardized tables* provide data from multiple times for a single census's geographic units. At this time, NHGIS's standardized time series tables provide 1990, 2000, and 2010 data for *2010 census units*.

To allocate 1990 and 2000 summary data to 2010 census units, NHGIS reaggregates data from the smallest source units for which 1990 and 2000 data are available: census blocks. Where a source block intersects multiple 2010 units, NHGIS applies interpolation to estimate how the source block's characteristics are distributed among the 2010 units.

Detailed methodology:

- [2000 Block Data Standardized to 2010 Geography](#)
- [1990 Block Data Standardized to 2010 Geography](#)

For each standardized statistic, NHGIS also supplies lower and upper bounds based on the spatial relationship between the source units and standard units. For example, if there are three 2000 census blocks that straddle a 2010 census unit's boundary, then it is possible that either all or none of the three blocks' 2000 residents were located in the 2010 unit. The upper bound assumes that all residents and housing units in straddling blocks were located in the 2010 unit, and the lower bound assumes that none were. [Bounds for 1990 estimates](#) also take account of additional uncertainty due to accuracy improvements in Census Bureau's geographic data files, which make it impossible to determine exact spatial relationships between 1990 and 2010 units.

NHGIS has not yet implemented standardization for non-count statistics such as medians and quotients. Therefore, currently available standardized tables supply only count statistics.

NHGIS delivers standardized statistics with two decimal digits of precision in order to reduce the size of rounding errors when users sum estimates. Rounding errors may still
