# 1 Introduction

---

## 1.1 The American Community Survey

The American Community Survey (ACS) is a part of the U.S. Census Bureau's Decennial Census Program and is designed to provide more current demographic, social, economic, and housing estimates throughout the decade. The ACS provides information on more than 40 topics, including education, language ability, the foreign-born, marital status, migration and many more. Each year the survey randomly samples around 3.5 million addresses and produces statistics that cover 1-year, 3-year, and 5-year periods for geographic areas in the United States and Puerto Rico. The 5-year estimates are available for many distinct geographies including the nation, all 50 states, DC, Puerto Rico, counties, places, census tracts, and block groups. For more information about the ACS, please visit our home page at: [www.census.gov/acs](http://www.census.gov/acs). ACS tables are published on the Census Bureau's American FactFinder (AFF) website, [factfinder2.census.gov](http://factfinder2.census.gov), and are available for download in several forms. This document will brief data users on the contents of the ACS Summary File and explain how they can use it to obtain the 5-year estimates.

## 1.2 The American Community Survey Summary File

The American Community Survey Summary File (ACSSF) is a unique data product that includes all the estimates and margins of error from the Detailed Tables and geographies that are published for the ACS. Other ACS data products such as Subject Tables and Data Profiles are created from the Detailed Tables and are therefore not available in the Summary File.

Since the Detailed Tables contain a large number of cells, the tables are stored in a series of files with only the data from the tables, without such information as the title of the tables, the description of the rows, and the names of the geographic areas. That information is in other files that the user must merge with the data files to reproduce the tables.

The ACS Summary File data files are in American Standard Code for Information Interchange (ASCII) format. The files are divided into three types:

- Geographies – (position based and comma delimited)
- Estimates – (comma delimited)
- Margins of Error – (comma delimited)

[Chapter 2](#) discusses each component in detail and explains how to put them all together.

### 1.3 Topics and Geographies Covered

Data contained in the ACS Summary File cover demographic, social, economic, and housing subject areas. All Detailed Tables for the ACS 5-year estimates are in the Summary File and are listed in [Appendix E](#).

The published ACS Summary File geographies cover areas that are based on “summary levels”. A summary level specifies the content and the hierarchical relationships of the geographic elements that are required to tabulate and summarize data. For example, summary level code “040” represents the U.S. States, Washington D.C., and Puerto Rico; while summary level code “050” represents counties and county equivalents within states.

In addition to the ACS 1-year and 3-year summary levels, additional summary levels are included in the 5-year estimates, including census tracts and block groups, and additional information for geographies such as American Indian areas, core based statistical areas, combined statistical areas, Congressional districts and state legislative districts. See the full list of summary levels published for the 5-year Detailed Tables in [Appendix F](#). For the 2008-2012 ACS 5-year data release, data for census block groups are not published on American FactFinder and are only available using the ACS Summary File. The list of tables in [Appendix E](#) shows which tables are available at the block group level.

Many resources are available to help users understand the ACS geographic terms and concepts. For additional information, please visit [www.census.gov/geo/www/reference.html](http://www.census.gov/geo/www/reference.html) and [http://www.census.gov/acs/www/guidance\\_for\\_data\\_users/geography/](http://www.census.gov/acs/www/guidance_for_data_users/geography/). Users may also find the full list of summary levels published for the 5-year Detailed Tables in [Appendix F](#).

### 1.4 Tools for Obtaining Data

Since using the ACS Summary File can be challenging, users should first check if their tables of interest are available for download on American FactFinder, or use DataFerrett, which includes the ability to analyze the data down to the block group level. Below are some other options to help users retrieve the tables they want. They are listed in order based on ease of use.

- Summary File Retrieval Tool

The Summary File Retrieval Tool is a macro-driven Excel spreadsheet that provides a method to easily retrieve a table for the nation, states, and all of the geographic areas in a state (or for all cross-state geographic areas such as metropolitan statistical areas or census regions). This tool is designed to be easy to use, and does not require any programming experience. There is a drop down menu from which the user can select the state for the table and receive data for all geographies within the state. One key requirement is that Microsoft Excel 2007 or later is needed. Other hardware and software requirements for the tool are listed in Chapter 3.1. For more information about the application, visit the ACS Summary File page at [www.census.gov/acs/www/data\\_documentation/summary\\_file/](http://www.census.gov/acs/www/data_documentation/summary_file/). A new video about using the application is also available on this page.

- **Summary File Excel Import Tool**

The Summary File Excel Import Tool is a replicate of the Excel templates that Census 2000 provided for the SF3 summary file release. The Excel Import Tool provides a basic layout of each sequence in Excel in the same format as the estimate and margin of error files are formatted. For individuals that do not have Excel 2007 or later and are unable to use the Excel Retrieval Tool, the Excel Import Tool provides an alternative option to read the summary file into Excel. For more information on this tool, see Chapter 3.3.

- **SAS Programs**

There are two programming options for SAS users. The first option is a set of individual SAS programs, one for each summary file by geography and sequence. These programs are best for users only interested in looking at a specific sequence for a specific geography. The second option is a single SAS program that is parameterized to allow users to read in any sequence for any geography into SAS. This program can also be used to read the entire summary file into SAS, and is designed for users looking for a large amount of data. For more information on these programs, see Chapter 3.1.

- **Summary File DataFerrett Tool**

DataFerrett is a tool provided by the Census Bureau to help users view, download, and manipulate a wide variety of data sets to suit their needs. Among the features provided by this tool is the ability to construct user-defined variables from the variables on the input data file(s), the ability for users to exclude data that is not of interest, a variety of options for downloading data, and the ability to create complex tabular reports from the data including graphs and thematic maps. This tool will be ideal for data users who wish to view, customize, and restrict the data that is available in the 2008-2012 ACS Summary File. For more information on this tool, see Chapter 3.4.

## **1.5 Notable Changes to the Summary File**

For those who have used the ACS Summary File in previous years, the files for the 5-year estimates are similar to prior publications, with the following exceptions:

- **ACS Summary File Retrieval Tool Video Available**

A new video about accessing block group level data using the ACS Summary File Retrieval Tool is now available on the Summary File page at [http://www.census.gov/acs/www/data\\_documentation/summary\\_file/](http://www.census.gov/acs/www/data_documentation/summary_file/). Although the video uses block groups as an example, the steps are applicable to other geography levels as well.

- **New Topics Available in 5-year Release**

The 2008-2012 ACS 5-year data release is the first 5-year data release to include health insurance coverage, disability, marital history, and veterans' service-connected disability status and ratings. Check [Appendix E](#) for the availability of Detailed Tables for these topics.

- **Zip Code Tabulation Areas (ZCTAs) Included in the United States Folder**

If you are interested in using zip code tabulation areas (ZCTAs), they are available in the United States folder (not the state folders). Learn more in [Section 2.2](#).

## 1.6 Contact Us

Please send any technical questions or comments on the ACS Summary File you have via email to: [acso.users.support@census.gov](mailto:acso.users.support@census.gov). If you have questions or comments about the American Community Survey, you can submit a question online at [ask.census.gov/](http://ask.census.gov/).

## 2 How to Use the ACS Summary File

### 2.1 Locating the Summary File

The 2008-2012 ACS 5-year Summary File is accessible from the American Community Survey home page. From the ACS home page, [www.census.gov/acs](http://www.census.gov/acs), click on the **Data and Documentation** tab, select the option for **Summary File**, as shown below:

The screenshot shows the American Community Survey website interface. At the top, there is a navigation bar with the following tabs: People, Business, Geography, Data, Research, and Newsroom. Below this, there is a secondary navigation bar with tabs: Main, About the Survey, Guidance for Data Users, Data & Documentation, Methodology, and Library. The 'Data & Documentation' tab is selected, and a dropdown menu is visible with the following options: Data Releases, Data Product Descriptions, Documentation, Geography, Downloadable data via FTP, Summary File, Public Use Microdata Sample (PUMS), and Custom Tabulations. The 'Summary File' option is highlighted with a white arrow. The main content area features a 'Question Corner' section with a question about income data, a 'What is the American Community Survey?' section with an American flag image, and a 'Data by Topic' section with a list of topics including Age and Sex / Aging, Ancestry, Disability, Commuting to Work, Education, Employment, Family/Relationships, Income and Earnings, Language, Origins, and Population Change.

That will take you to the ACS Summary File page. Click on **5-year Summary File** to go to the ACS Summary File ftp site. The link is not available on the screenshot below, but it will be available for the release.

The screenshot shows the 'Summary File' page on the Census Bureau website. The page title is 'Summary File' and it includes a description: 'An ACS Summary File is a set of comma-delimited text files that contain all of the Detailed Tables for the ACS 1-year, 3-year or 5-year estimates. For example, the 2008 ACS 1-year Summary File includes hundreds of comma-delimited text files that are best viewed in a spreadsheet or using statistical software.' Below the description is a table with columns for years from 2012 to 2005. Under the '2008-2012 ACS 5-Year Estimates' column, there is a link for '2008-2012 ACS 5-Year Estimates' with a planned release date of December 2013. A white arrow points to this link.

The screenshot shows a file directory listing on the Census Bureau website. The listing has columns for 'Name', 'Last modified', 'Size', and 'Description'. The files listed are:

Name	Last modified	Size	Description
<a href="#">Parent Directory</a>		-	
<a href="#">2012 ACSSF All In 1 Giant File (Experienced-Users-Only)/</a>	04-Sep-2013 15:33	-	
<a href="#">2012 ACSSF By State All Tables/</a>	22-Aug-2013 11:50	-	
<a href="#">2012 ACSSF By State By Sequence Table Subset/</a>	09-Sep-2013 15:06	-	
<a href="#">ACS2012 1-Year TableShells.xls</a>	11-Sep-2013 09:49	3.5M	
<a href="#">ACS 2012 SF Tech Doc.pdf</a>	09-Sep-2013 13:55	3.4M	
<a href="#">SequenceNumberTableNumberLookup.sas7bdat</a>	11-Jul-2013 15:41	10M	
<a href="#">Sequence Number and Table Number Lookup.txt</a>	11-Jul-2013 15:42	2.0M	
<a href="#">Sequence Number and Table Number Lookup.xls</a>	11-Sep-2013 11:25	5.4M	
<a href="#">UserTools/</a>	09-Sep-2013 10:55	-	

This is the ACS Summary File—it is actually comprised of three folders that are explained the next chapter.

## 2.2 Summary File Organization

The Summary File is organized in three folders as shown in the above screenshot. These three directories contain the same combination of files; they are simply arranged differently to accommodate various user needs:

- 2008-2012\_ACSSF\_All\_In\_1\_Giant\_File(Experienced-Users Only)

The “All in 1 Giant File” directory contains a zipped file, which includes geography, estimate, and margin of error files. This zipped file is ideal to download if users want estimates and margins of error for all geographies throughout the nation at once. The file is very large and should only be used by those that can easily process a very large file. For a graphical representation of this folder and its contents, visit [Appendix B.1](#).

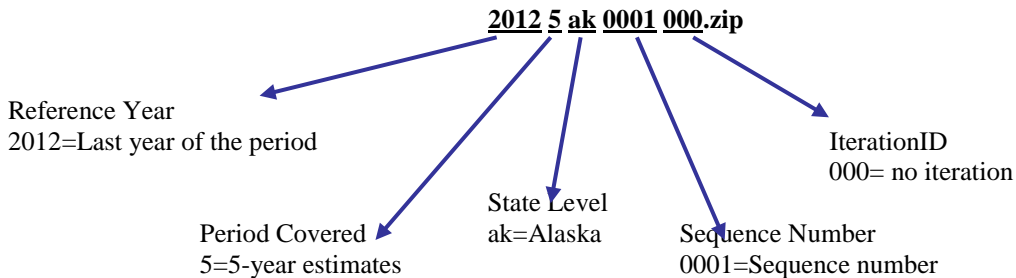

- 2008-2012\_ACSSF\_By\_State\_All\_Tables

The “By State All Tables” directory contains zipped files for each state or state level equivalent--each of the 50 states, District of Columbia, Puerto Rico, as well as cross-state geographies such as metropolitan areas. Each zipped file contains a geography file and multiple estimate and margin of error files. Downloading from these state level folders is ideal if users want all the tables for a state level geography or cross-state geographies. For a graphical representation of this folder and its contents, visit [Appendix B.2](#).

- 2008-2012\_ACSSF\_By\_State\_By\_Sequence\_Table\_Subset

The “By State By Sequence Table Subset” directory contains folders for each state or state level equivalent--each of the 50 states, District of Columbia, Puerto Rico, as well as cross-state geographies such as metropolitan areas. Within those folders are a geography file and zipped files containing the estimate and margin of error files, one per “sequence” (sequences are explained in [Chapter 2.3](#)). Downloading from these folders is ideal if users only want a few tables for a state level geography or cross-state geographies. For a graphical representation of this folder and its contents, visit [Appendix B.3](#).

The naming convention used for the zipped files in this directory is the following:

File Name: 20125ak0001000.zip		
Example	Name	Range or Type

2012	Reference Year	ACS data year (last year of the period for multiyear periods)
5	Period Covered	1=1-year, 3=3-year, 5=5-year
ak	State Level	US or abbreviations for state, District of Columbia, and Puerto Rico
0001	Sequence Number	0001 to 9999
000	IterationID	Iteration ID for Selected Population Tables and American Indian & Alaska Native Tables. Note: Iteration ID is always "000" for the standard 1-Year, 3-Year, and 5-Year products.

As [Appendix B](#) shows, the “All in 1 Giant File” and the “By State All Tables” folders contain the same tables as the “By State By Sequence Table Subset” folder. The difference is in the organization. The “By State All Tables” zipped files contain all of the sequence files for the given state, so each zipped file contains 354 files. The “All in 1 Giant File” zipped file contain all sequence files for all states, which is thousands of files.

As mentioned earlier, the zipped files are divided by state or state-level equivalents. Those state-level equivalents include the District of Columbia and Puerto Rico. There is also a level called “United States,” which is for summary levels that can cross state boundaries, such as the Nation, and all Regions, Divisions, Metropolitan Statistical Areas, Zip Code Tabulation Areas (ZCTAs), and Tribal Reservations. The United States level does not contain tables for geographies that are always entirely within a state, such as counties and places; for those tables, go to the folder or files for that state.

The following is a table that gives examples of the types of summary levels are in the state and state-level equivalent folders and files and those that are in the United States folders and files.

Each State, DC, and Puerto Rico	United States
State	United States
County	Region
County subdivision	Division
Place	Metropolitan or urban statistical areas
Congressional districts (110th Congress)	New England City and Town Area (NECTA)
Public Use Microdata Area (PUMA)	American Indian/Alaska Native/Hawaiian Home Land areas
School Districts	Urban areas
Alaska Native Regional Corporation	Zip Code Tabulation Areas (ZCTAs)

### 2.3 Sequence Numbers

Detailed Tables for similar subject areas are grouped together in “sequences”. A sequence number is an assigned number to a grouping of ACS tables. Table sequencing now follows these new rules:

1) Tables are sorted numerically by the "root" of their Table ID, where the "root" is defined as the numeric section after the first letter and before any additional letters, so for example the root of B06004APR is "06004". For tables with the same root, additionally sort them in the following order:

- Non-iterated, non-collapsed, non-PR version (e.g., Table B06003)
- Iterated, non-collapsed, non-PR versions (e.g., Tables B06004A, B06004B...B06004I)
- Non-iterated, collapsed, non-PR version (e.g., Table C06001)

Iterated, collapsed, non-PR version (e.g., Tables C08505A, C08505B... C08505I)  
 Non-iterated, non-collapsed, PR version (e.g., Table B06003PR)  
 Iterated, non-collapsed, PR versions (e.g., Tables B06004APR, B06004BPR...B06004IPR)  
 Non-iterated, collapsed, PR version (e.g., Table C06001PR)  
 Iterated, collapsed, PR version (e.g., Table C06001APR)

2) With tables sorted in this order, start with the first table and assign it to the first sequence. For each subsequent table, if the table has either a new "subject", a new "geography type", or would cause the number of cells in the sequence to exceed 245, then start a new sequence. "Subject" is described using the second and third characters in the Table ID, so for example the subject of B06004APR is "06" for place of birth. You can view a complete list of subjects at <https://ask.census.gov/faq.php?id=5000&faqId=1687>. "Geography type" can be one of three things: Place of Residence geography type, Place of Work geography type, or Residence 1 Year Ago geography type.

3) If a table does not fit in one sequence, then put the first 245 cells of it in one sequence, and the rest in the next. If a table does not fit in two sequences, then put the first 245 cells of it in one sequence, the next 245 cells of it in the next sequence, and the rest in a third sequence.

The rules governing how many tables can be assigned the same sequence number depend on the following:

- There are no more than 256 cells per sequence, so the data can be read into a spreadsheet. There are 245 data cells and 11 other cells reserved for identifying information.
- There are 120 sequences for the 2008-2012 ACS 5-year Summary File.
- Tables are grouped numerically by the "root" of their Table ID, (i.e., Table B00001 is in sequence file 0001).
- Tables with race iterations are grouped in the same sequence.

It is critical to know the sequence number associated with a Detailed Table (Table ID) for two reasons. First, one needs it in order to access the correct estimates and margins of error files for the desired table. Second, the field start position for the estimates or margins of error of a certain Detailed Table depends on its sequence number.

The Sequence Number and Detailed Table Number Lookup file, available as an Excel spreadsheet, text file, and SAS dataset, lists Table IDs associated with each sequence number. This spreadsheet, formerly known as "merge\_5\_6", is available at [www2.census.gov/acs2012\\_5yr/summaryfile/](http://www2.census.gov/acs2012_5yr/summaryfile/). The name of the Excel spreadsheet is "Sequence\_Number\_and\_Table\_Number\_Lookup.xls," the text file is called "Sequence\_Number\_and\_Table\_Number\_Lookup.txt," and the SAS dataset is called "SequenceNumberTableNumberLookup.sas7bdat."

For example, to find the sequence number associated with the table B08406, a user must open and look for that Table ID in the Sequence Number and Table Number Lookup file. Shown below is a screenshot of this file opened to where the "tblid" is B08406. The next column in the file, "seq", shows that this Table ID is associated with the sequence number "0029". In order to

access the estimate and margin of error file for Table B08406, a user will need to download the estimate and margin of error files labeled with the sequence number “0029”.

	A	B	C	D	E	F	G	H	I
5923	ACSSF	B08406	29			7 51 CELLS		SEX OF WORKERS BY MEANS OF TRANSPORTATION	
5924	ACSSF	B08406	29					TO WORK FOR WORKPLACE GEOGRAPHY	Journey to Work

5943	ACSSF	B08406	29	19				Male:	
								Car, truck, or van:	

## 2.4 Geography File

There is a geography file that comes with the estimate and margin of error files. This file begins with a “g” and is an ASCII file using either a position based format or comma delimited format. A geography file exists for each state or state level equivalent.

Geography files are named using the following convention:

File Name: g20125ak.txt		
Example	Name	Range or Type
g	File Type	g=geography
2012	Reference Year	ACS data year (last year of the period for multiyear periods)
5	Period Covered	1=1-year, 3=3-year, 5=5-year
ak	State Level	US or abbreviations for state, District of Columbia, and Puerto Rico

The geography files contain geographic information for an ACS tabulated area, including the name of the area. One variable on the file, called LOGRECNO, is the logical record number and

is used to link the level of geography to the estimate and margin of error files. An example of how to use LOGRECNO is discussed in [Chapter 2.5](#).

The following table provides the layout of the geography file:

Variable Name	Description	Field Size	Starting Position	Geographic Summary Levels For 5-year Tables
<b>RECORD CODES</b>				
FILEID	Always equal to ACS Summary File identification	6	1	All Summary Levels
STUSAB	State Postal Abbreviation	2	7	All Summary Levels
SUMLEVEL	Summary Level	3	9	All Summary Levels
COMPONENT	Geographic Component	2	12	All Summary Levels
LOGRECNO	Logical Record Number	7	14	All Summary Levels
<b>GEOGRAPHIC AREA CODES</b>				
US	US	1	21	010, 410, 430
REGION	Census Region	1	22	020
DIVISION	Census Division	1	23	030
STATECE	State (Census Code)	2	24	Blank for all summary levels
STATE	State (FIPS Code)	2	26	040, 050, 060, 067, 070, 080, 140, 150, 155, 160, 170, 172, 230, 260, 269, 270, 280, 283, 286, 290, 311, 312, 313, 315, 316, 320, 321, 322, 323, 324, 331, 333, 336, 338, 340, 341, 345, 346, 351, 352, 353, 354, 356, 357, 358, 360, 361, 362, 363, 364, 365, 366, 410, 430, 500, 510, 550, 610, 612, 620, 622, 795, 950, 960, 970
COUNTY	County of current residence	3	28	050, 060, 067, 070, 080, 140, 150, 155, 270, 313, 316, 322, 324, 353, 354, 357, 358, 362, 363, 365, 366, 410, 430, 510, 612, 622
COUSUB	County Subdivision (FIPS)	5	31	060, 067, 070, 080, 354, 358, 363, 366
PLACE	Place (FIPS Code)	5	36	070, 080, 155, 160, 172, 269, 312, 321, 352, 361
TRACT	Census Tract	6	41	080, 140, 150
BLKGRP	Block Group	1	47	150
CONCIT	Consolidated City	5	48	170, 172

We also provide an Excel template for the geography file named “2008-2012\_SFGeoFile Template.xls”. The template provides users with two rows containing the variable names and their descriptions (as displayed in the above table) for each column in the geography file. It is meant to be used with the comma delimited version of the geography file. The template is available at [www2.census.gov/acs2012\\_5yr/summaryfile/UserTools/](http://www2.census.gov/acs2012_5yr/summaryfile/UserTools/) in the zipped “2008-2012\_SummaryFileTemplates” folder. Here is a screenshot of the Excel file:

Each state, the District of Columbia, Puerto Rico and the set of cross-state geographies, have one geography file associated with them regardless of how the Summary File is accessed. For example, the following screenshot shows the beginning of the state geography file for Maryland. In the screenshot, the logical record numbers corresponding with the state of Maryland, Allegany County, and Anne Arundel County are circled. The logical record number for the state of Maryland is “0000001”, for Allegany County it is “0000012”, and for Anne Arundel County it is “0000013”.

File ID	Logical Record Number	Description
ACSSF MD040000000001	24	04000US24 Maryland
ACSSF MD040010000002	24	04001US24 Maryland; Urban
ACSSF MD040430000003	24	04043US24 Maryland; Rural
ACSSF MD040A00000004	24	040A0US24 Maryland; In metropolitan or micropolitan statistical area
ACSSF MD040C00000005	24	040C0US24 Maryland; In metropolitan statistical area
ACSSF MD040C10000006	24	040C1US24 Maryland; In metropolitan statistical area -- in principal city
ACSSF MD040C20000007	24	040C2US24 Maryland; In metropolitan statistical area -- not in principal city
ACSSF MD040E00000008	24	040E0US24 Maryland; In micropolitan statistical area
ACSSF MD040E20000009	24	040E2US24 Maryland; In micropolitan statistical area -- not in principal city
ACSSF MD040G00000010	24	040G0US24 Maryland; Not in metropolitan or micropolitan statistical area
ACSSF MD040H00000011	24	040H0US24 Maryland; Not in metropolitan statistical area
ACSSF MD050000000012	24001	05000US24001 Allegany County, Maryland
ACSSF MD050000000013	24003	05000US24003 Anne Arundel County, Maryland
ACSSF MD050000000014	24005	05000US24005 Baltimore County, Maryland
ACSSF MD050000000015	24009	05000US24009 Calvert County, Maryland

Excess spaces in the pictured geography file have been removed for illustrative purposes.

## 2.5 Estimate and Margin of Error Files

Each of the three Summary File directories include zipped files containing estimate files (file names beginning with an “e”) and margins of error files (file names beginning with an “m”). The estimate files contain published ACS estimates and the margin of error files contain published ACS margins of error for their respective estimates. Here is the naming convention used for those files:

File Name: e20125ak0001000.txt		
Example	Name	Range or Type
e	File Type	e=estimate, m=margin of error
2012	Reference Year	ACS data year (last year of the period for multiyear periods)
5	Period Covered	1=1-year, 3=3-year, 5=5-year
ak	State Level	US or abbreviations for state, District of Columbia and Puerto Rico
0001	Sequence Number	0001 to 9999
000	Reserved for future use	Iteration value for future use

The estimates and margins of error for Detailed Tables are grouped together in by sequence numbers, as discussed in [Chapter 2.3](#). There is an estimate and margin of error file for each sequence number.

The format of the estimate and margin of error files are identical; they are strings of comma-delimited ASCII text. Each row represents a different geographic area and the first six fields contain metadata such as the geographic area and the sequence number. Following those fields are the estimates or margins of error for the Detailed Tables. Starting and ending positions of the fields associated with each Detailed Table can be found using the Sequence Number and Table Number Lookup file, which is discussed in [Chapter 2.3](#). The estimates or margins of error for one Detailed Table span several fields within a row.

Here is the record layout of the estimates and the margin of error files:

Field Name	Description	Field Size
FILEID	File Identification	6 Characters
FILETYPE	File Type	6 Characters
STUSAB	State/U.S.-Abbreviation (USPS)	2 Characters
CHARITER	Character Iteration	3 Characters
SEQUENCE	Sequence Number	4 Characters
LOGRECNO	Logical Record Number	7 Characters
Field # 7 and up	Estimates	Various

Going back to the example from [Chapter 2.3](#), we know that table B08406 corresponds to sequence “0029”. Additionally, the Sequence Number and Table Number Lookup file (as shown earlier) tells us that table B08406 begins at position seven and contains 51 cells.

In order to get estimates for Maryland; Allegany County, MD; and Anne Arundel County, MD one must recall the logical record numbers associated with each geography. In [Chapter 2.4](#), we identified these to be “0000001”, “0000012”, and “0000013”, respectively. The logical record number, LOGRECNO, must be used to merge the geography information to the estimate and margin of error files.

The example below shows the estimate file for sequence “0029” and all geographies except census tracts and block groups for the state of Maryland using the 2009 ACS 3-year Summary File. For the 2008-2012 ACS 5-year Summary File, the dots “.” in the below screenshot will be replaced by empty cells as documented in [Appendix C.3](#). Note that each row has a uniquely

assigned logical record number, called LOGRECNO, which links the estimate to a specific geographic area. The pictured example has the logical record numbers corresponding to Maryland, Allegany County, and Anne Arundel County circled. Estimates for table B08406 at these geographic levels can be found within their respective rows at field seven and continuing for 50 additional fields.

## 2.6 How to Join the ACS Summary File to the TIGER/Line Shapefiles

TIGER/Line Shapefiles allow data users to directly link geographic areas to data from the American Community Survey and other surveys. The TIGER/Line Shapefiles are designed for use with geographic information system (GIS) software. Learn more about TIGER/Line Shapefiles at [www.census.gov/geo/www/tiger/](http://www.census.gov/geo/www/tiger/).

The variable GEOID joins the ACS Summary File to the TIGER/Line Shapefiles. For the ACS Summary File, GEOID is located in column AW of the geography file. It is not found in the estimates or margins of error files. (As discussed in previous chapters, the variable LOGRECNO is needed to join together the parts that make up the Summary File: the geography, estimates, and margins of error files). GEOID's corresponding variable in the 2012 TIGER/Line Shapefiles is also GEOID.

We will walk through an example of joining these files using Kent County, Delaware and the 2012 ACS 1-year estimates. In the ACS Summary File, the GEOID is 05000US10001. In the TIGER/Line Shapefiles, the GEOID is 10001. (GEOID is a concatenation of all the codes associated with a given geographic area, such as the state FIPS code, county FIPS code, etc. The exact concatenation varies by geographic area. In this example, 10=state FIPS code and 001=county FIPS code.)

The ACS Summary File GEOID contains the necessary information to connect to the TIGER/Line Shapefiles, but it needs to be modified in order to exactly match up. Notice that the ACS GEOID, **05000US10001**, contains the TIGER/Line GEOID string, **10001**.

In order to create an exact match of both GEOIDs, it is necessary to remove all of the characters before and including the letter “S” in the ACS Summary File. By removing these characters, the new GEOID in the ACS Summary File exactly matches the field GEOID in the TIGER/Line Shapefiles.

The following is an example of how to modify the ACS Summary File’s GEOID in Excel 2007 so it can be joined with TIGER/Line Shapefiles:

- 1) Open the ACS Summary File comma delimited geography file in Excel. This example uses Delaware’s geography file (20121de.csv) available at [www2.census.gov/acs2012\\_1yr/summaryfile/](http://www2.census.gov/acs2012_1yr/summaryfile/) with the column headers from the geography file template copied into Delaware’s geography file. Learn more about the geography file template in [Chapter 2.4](#).
- 2) Insert 2 blank columns to the right of the column “GEOID.” Your modified GEOID will eventually go into the second column. (Note: Columns F through AV in the diagrams following are hidden for illustrative purposes.)

	A	B	C	D	E	AW	AX	AY	
1	FILEID	STUSAB	SUMLEVE	COMPON	LOGRECNO	GEOID			NAME
2	equal to ACS Summary File	State Postal Abbreviation	Summary Level	Geographic Component	Logical Record Number	Geographic Identifier			Area Name

12	ACSSF	DE	40	H0	10	040H0US10			Delaware -- Not in metropolitan statistical area
13	ACSSF	DE	50	0	11	05000US10001			Kent County, Delaware
14	ACSSF	DE	50	0	12	05000US10003			New Castle County, Delaware
15	ACSSF	DE	50	0	13	05000US10005			Sussex County, Delaware
16	ACSSF	DE	160	0	14	16000US1077580			Wilmington city, Delaware
17	ACSSF	DE	312	0	15	31200US379801077580			Wilmington city, DE; Philadelphia-Camden
18	ACSSF	DE	500	0	16	50000US1000			Congressional District (at Large) (112th Co
19	ACSSF	DE	795	0	17	79500US1000101			PUMA5 00101, Delaware
20	ACSSF	DE	795	0	18	79500US1000102			PUMA5 00102, Delaware
21	ACSSF	DE	795	0	19	79500US1000103			PUMA5 00103, Delaware
22	ACSSF	DE	795	0	20	79500US1000104			PUMA5 00104, Delaware

4) Select the “Data” tab from the top menu, then select “Text to Columns.” The “Convert Text to Columns Wizard” box should pop up.

5) In the “Convert Text to Columns Wizard,” select “Delimited” under “Choose the file type that best describes your data:” then click “Next.”

- 6) Check “Other” as the delimiter and type the letter “S” into the box. Click “Next.”

- 7) In the “Data preview” window, click on the top of both columns in “Data preview” and select “Text” under “Column data format.” In “Destination,” select the two blank columns that you created in Step 1. Click “Finish.”

- 8) Column AY should now contain the modified ACS GEOID that corresponds to GEOID in the TIGER/Line Shapefiles. The second screenshot shows the TIGER/Line Shapefile for Kent County, Delaware.

- 9) The ACS Summary File and the TIGER/Line Shapefile should now be ready to be joined using GIS software. Visit “Working with TIGER/Line Shapefiles” at <https://www.census.gov/geo/education/howtos.html> to learn more about how to access and use the TIGER/Line Shapefiles.

**TIGER/Line Shapefiles Pre-joined with ACS Data**

A limited set of TIGER/Line Shapefiles are available pre-joined with selected 2008-2012 ACS 5-year tables in geodatabase format. Learn more on the Census Bureau geography page at <http://www.census.gov/geo/maps-data/data/tiger-data.html>.

## 3 User Tools

---

### 3.1 Summary File Excel Retrieval Tool

If only a few tables are needed, a useful tool is the Summary File Excel Retrieval Tool. If users have Excel 2007 or later, the tool is able to get tables from an entire sequence and from a summary level and component. Information on how to use Summary File Excel Retrieval Tool is located on the ACS Summary File page, at [www.census.gov/acs/www/data\\_documentation/summary\\_file](http://www.census.gov/acs/www/data_documentation/summary_file).

Hardware and Software requirements for the application include:

- Microsoft Windows XP Professional Service Pack 3 or newer
- WinZip version 14.5 or compatible
- 32 bit Office 2007 or newer
- DSL connection at 1.0 Mbps or greater is recommended

### 3.2 Summary File SAS Tool

For users with SAS software, please visit the User Tools folder, [http://www2.census.gov/acs2012\\_5yr/summaryfile/UserTools/](http://www2.census.gov/acs2012_5yr/summaryfile/UserTools/) to download SAS programs. These programs allow users to load the Summary File data into SAS Datasets. The SAS programs serve as a reference for the users, and include variable labels, however modifications may be necessary before users can get the data. After the needed Summary File data have been downloaded, users should specify the locations in the library references and the infile statements.

- 1) SF20125YR\_SAS.zip – Contains SAS programs, which can be used to convert each estimate and margin of error into SAS Datasets. The SAS datasets include table stubs. There is one individual SAS program for each sequence per state.
- 2) SF\_All\_Macro.sas – This is a detailed example SAS program containing SAS macros which access the ACS Summary File geography, estimate and margin of error data. It creates one table for all geographies from the ACS Summary File. Segments of the SAS codes can be used to convert geography files into SAS datasets.

### 3.3 Summary File Excel Import Tool

This tool is another way data users can read the Summary File into Excel, and it is designed to be compatible with any version of the software. While this example uses the 2007-2009 ACS 3-year Summary File, the file layout is similar for the 2008-2012 ACS 5-year Summary File. To begin using this tool, users must first download the Summary File data, the Excel template file, and the Excel geography file.

The 2007-2009 ACS 3-year Summary File is available at [http://www2.census.gov/acs2009\\_3yr/summaryfile/](http://www2.census.gov/acs2009_3yr/summaryfile/). In this example, we are accessing the data by selecting “2007-2009 ACSSF By State All Tables,” then selecting “California All Geographies.zip.” Once downloaded and unzipped to a local directory, this compressed file contains individual text files and one geography file per Summary File sequence. We are using Sequence file 1, so you need to open and save the corresponding estimate and margin of error text files (e20093ca0001000.txt and m20093ca0001000.txt).

Next, you need to download the Excel template file, SummaryFileXLS.zip, from [http://www2.census.gov/acs2009\\_3yr/summaryfile/UserTools/](http://www2.census.gov/acs2009_3yr/summaryfile/UserTools/). (Note: SummaryFileXLS.zip is named SummaryFileTemplates.zip for 2009-2011.) Once unzipped to a local directory, this compressed file contains an Excel file for each Summary File sequence. Again, we are using Sequence File 1, so you need to open Seq1.xls.

Finally, you need to download and save the Excel geography file, mini\_geofile.xls, from [http://www2.census.gov/acs2009\\_3yr/summaryfile/UserTools/Geography/](http://www2.census.gov/acs2009_3yr/summaryfile/UserTools/Geography/) to the same local directory. Each worksheet in the mini\_geofile.xls represents geographies that are within a state. Note that the “US” worksheet only contains summary levels that can cross state boundaries. “US” is not the data at the national summary level.

We will walk through an example using sequence 1 for the state of California:

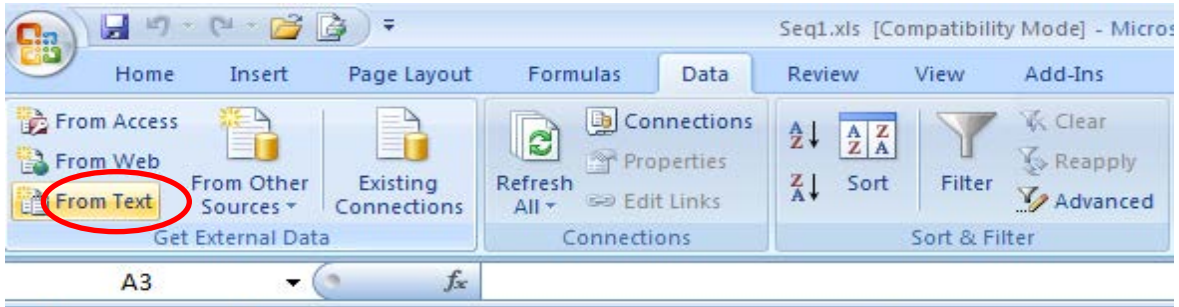

- 1) When the template file is open in Excel it should appear as below:

	A	B	C	D	E	F	G	H
1	FILEID	FILETYPE	STUSAB	CHARITER	SEQUENCE	LOGRECNO	B07401_001	B07401_002
2	FILEID	FILETYPE	STUSAB	CHARITER	SEQUENCE	LOGRECNO	Population 1	Population 1
3								
4								

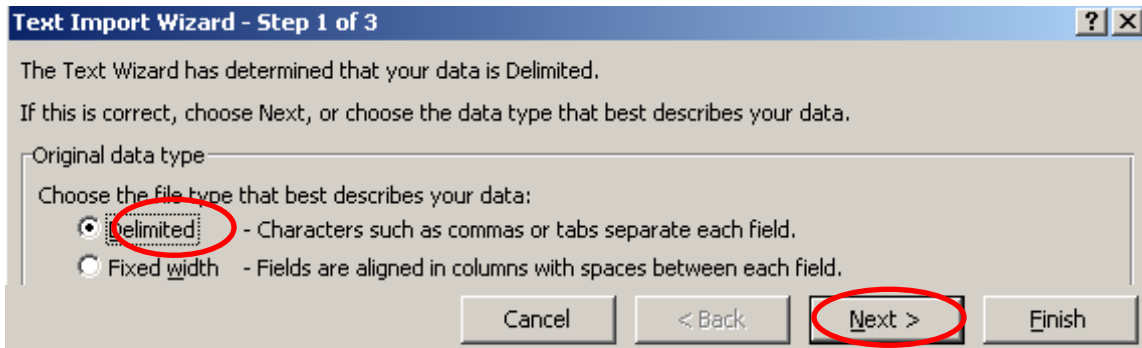

- 2) Place your cursor in cell **A3** and click on the **Data** tab in the Excel tool bar. See below:

	A	B	C	D	E	F	G
1	FILEID	FILETYPE	STUSAB	CHARITER	SEQUENCE	LOGRECNO	B07401_001
2	FILEID	FILETYPE	STUSAB	CHARITER	SEQUENCE	LOGRECNO	Population 1
3							

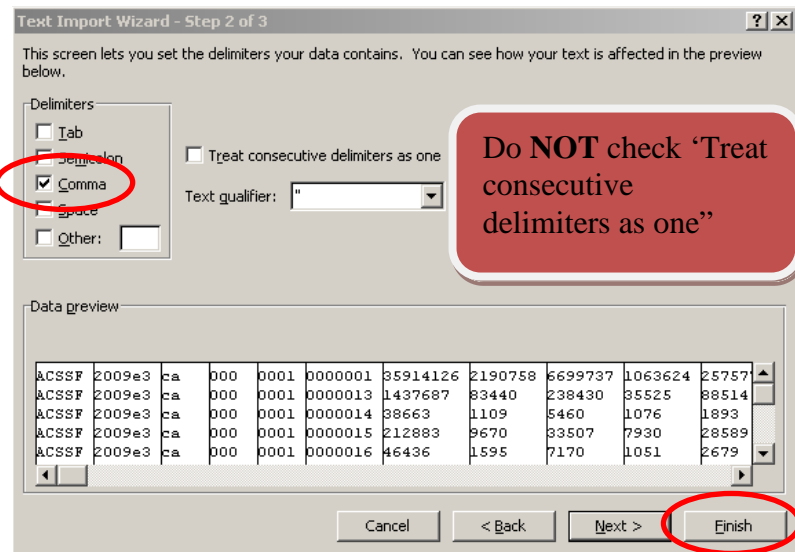

3) To import the Summary File text file into Excel click on **From Text** in the **Get External Data** section of the tool bar. In this example, we are opening the estimate file for California (e20093ca0001000.txt).

4) Step 1 of the Text Import Wizard will appear. Under **Original data type** choose **Delimited**, and then click **Next**.

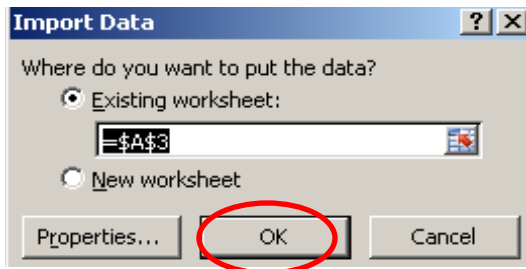

5) Step 2 of the Excel Text Import Wizard will appear. Under **Delimiters** choose **Comma**. Users may click **Finish** to import the file or choose **Next** to format the Excel columns.

6) A Pop up window will appear to confirm cell **A3** as the correct cell. Click **OK**.

7) The summary file will be imported in Excel as below:

	G	H	I	J	K	L
1	B07401_001	B07401_002	B07401_003	B07401_004	B07401_005	B07401_006
2	Population 1 year and over in the United States	Population 1 year and over in the United States% 1 to 4 years	Population 1 year and over in the United States% 5 to 17 years	Population 1 year and over in the United States% 18 and 19 years	Population 1 year and over in the United States% 20 to 24 years	Population 1 year and over in the United States% 25 to 29 years
3	35914126	2190758	6699737	1063624	2575775	2730510

*Row 1* – Contains a unique identifier of Table ID and Line Number with a “\_” between them

*Row 2* – Contains the associated metadata for each unique Identifier

*Row 3* – Is the first Row of the imported data

	A	B	C	D	E	F
1	FILEID	FILETYPE	STUSAB	CHARITER	SEQUENCE	LOGRECNO
2	FILEID	FILETYPE	STUSAB	CHARITER	SEQUENCE	LOGRECNO
3	ACSSF	20093	ca	0	1	1

*Column A* – Is a constant value of “ACSSF” (stands for ACS Summary File)

*Column B* – Contains the associated metadata for each unique Identifier

*Column C* – Is the first Row of the imported data

8) Read in the estimates and margins of error for each sequence needed. For example, here is the screenshot of the estimates for sequence 1 (the screenshots are for illustration purposes only and may not reflect the current data):

10) Add geographies by using common merged keys.

- a. To add geographies, insert two extra columns next to the padded LOGRECNO column G, and label them GEOID and Geography Name. Open the **Excel geography file** mini\_geofile.xls and keep both Seq1.xls and mini\_geofile.xls files open.

10) Repeat steps 1 through 10 to obtain the margin of errors for the same sequence for California.

### 3.4 DataFerrett Analytical Tool

Data from the summary file can be accessed using DataFerrett, a software application developed by the Census Bureau for disseminating large amounts of data. Users who have accessed the Public Use Microdata Sample (PUMS) files are likely already familiar with DataFerrett. As with the Summary File Excel Retrieval Tool, the DataFerrett approach is similar to American Factfinder in that users only need to know what detailed table they want; no reference to file organization of the ACS Summary File is required (e.g., “sequence number”). This is an ideal application if you would like to create complex tabular reports from the data, including graphs and thematic maps, and/or download a large number of geographic areas for a small number of tables at one time—for example, the age by sex table for all tracts in the country.

There are some limitations to the DataFerrett application. There is a maximum of 74,100 geographic areas with up to 200 table lines in the extract. There can be no more than 535 table lines in any single extract. Also, for the initial release of the application, only some of the summary levels are available. Please see the DataFerrett documentation for the specific summary levels.

For a tutorial on how to use and access this application to retrieve Summary File data, please visit [dataferrett.census.gov/acs/acs2006-2010sf\\_readme.html](http://dataferrett.census.gov/acs/acs2006-2010sf_readme.html). Documentation of the important features and limitations of the initial release of the 2006-2010 ACS 5-Year Summary File in

DataFerrett can also be found there. For general information about the DataFerrett tool, visit [dataferrett.census.gov](http://dataferrett.census.gov).

## **4 User References**

---

### **4.1 Detailed Tables for the 2008-2012 ACS 5-year Estimates**

It contains information on all detailed tables included in the 2008-2012 ACS 5-year Summary File. The table list is located in Appendix E.

### **4.2 2008-2012 ACS 5-year Summary Levels/Components For Detailed Tables**

It contains a list of the summary levels and components that are included in the 2008-2012 ACS 5-year Detailed Tables. The list is located in Appendix F.

### **4.3 Sequence Number and Table Number Lookup**

It contains information on the relationship between the sequences and the tables, and indicates the relationship between the sequences and the subject areas. The Sequence Number and Table Number Lookup is available in Excel, text, and SAS dataset format, and is located here: [www2.census.gov/acs2012\\_5yr/summaryfile/](http://www2.census.gov/acs2012_5yr/summaryfile/).

### **4.4 Table Shells List**

It contains Table ID, Line Number, Unique ID (table ID + Line Number) and stub. The table shells list is located on the following site: [www2.census.gov/acs2012\\_5yr/summaryfile/](http://www2.census.gov/acs2012_5yr/summaryfile/).

### **4.5 Excel Geography File**

It contains logical record numbers (LOGRECNO), geography ID, and geographic labels by state. There are total of 53 tabs in the spreadsheet: one for each state, the District of Columbia and Puerto Rico, and one for geographies that cross state boundaries. The mini geography file list is located on the following site: [www2.census.gov/acs2012\\_5yr/summaryfile/UserTools/Geography/](http://www2.census.gov/acs2012_5yr/summaryfile/UserTools/Geography/).

## **Appendix A: Supplemental Documentation**

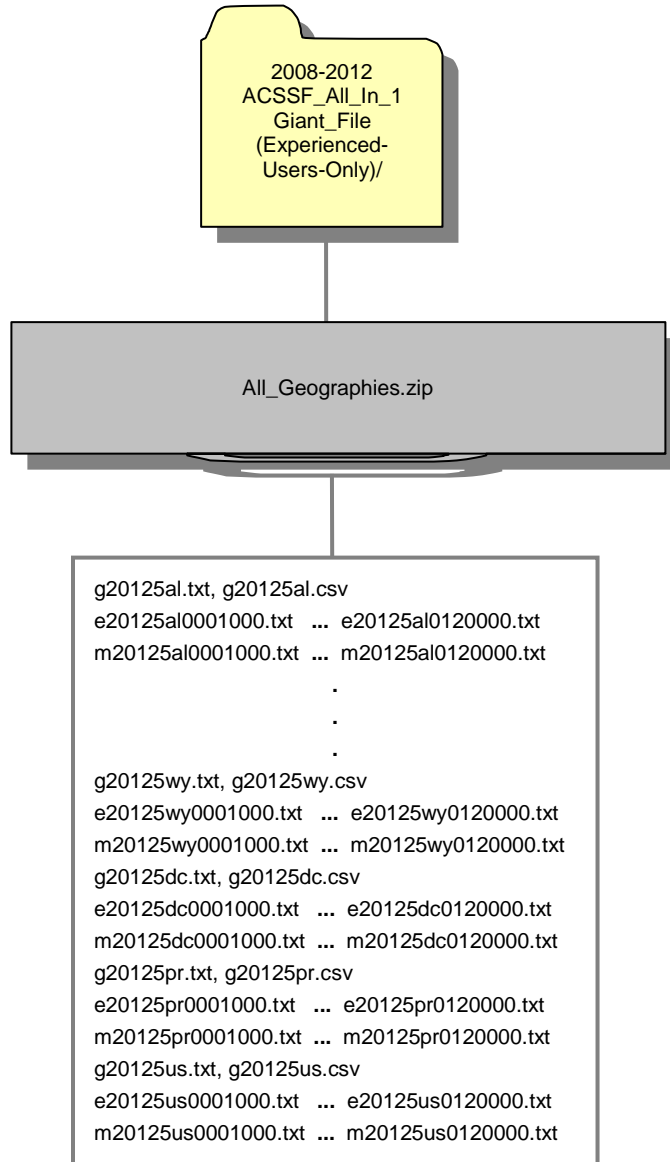

---

Supplemental documentation concerning the American Community Survey, to assist users using this technical document, is located on the ACS Website at: [www.census.gov/acs/www/data\\_documentation/documentation\\_main/](http://www.census.gov/acs/www/data_documentation/documentation_main/). Documents such as the Subject Definitions, Accuracy of the Data, and Code Lists are available on the URL listed above.

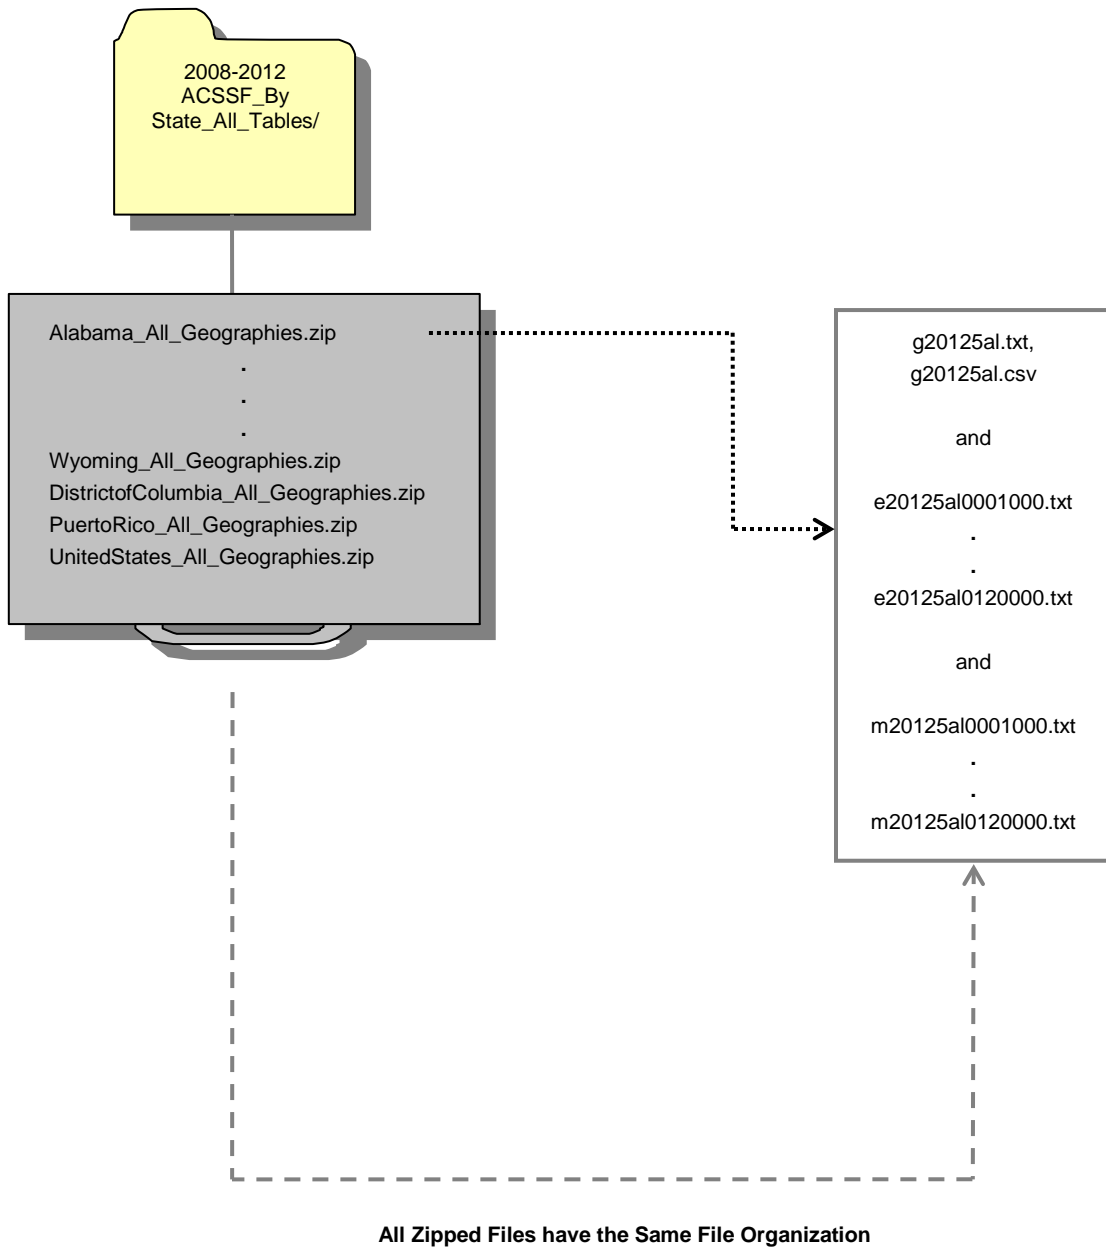

## Appendix B: Graphical Representation of ACS Summary File Organization

---

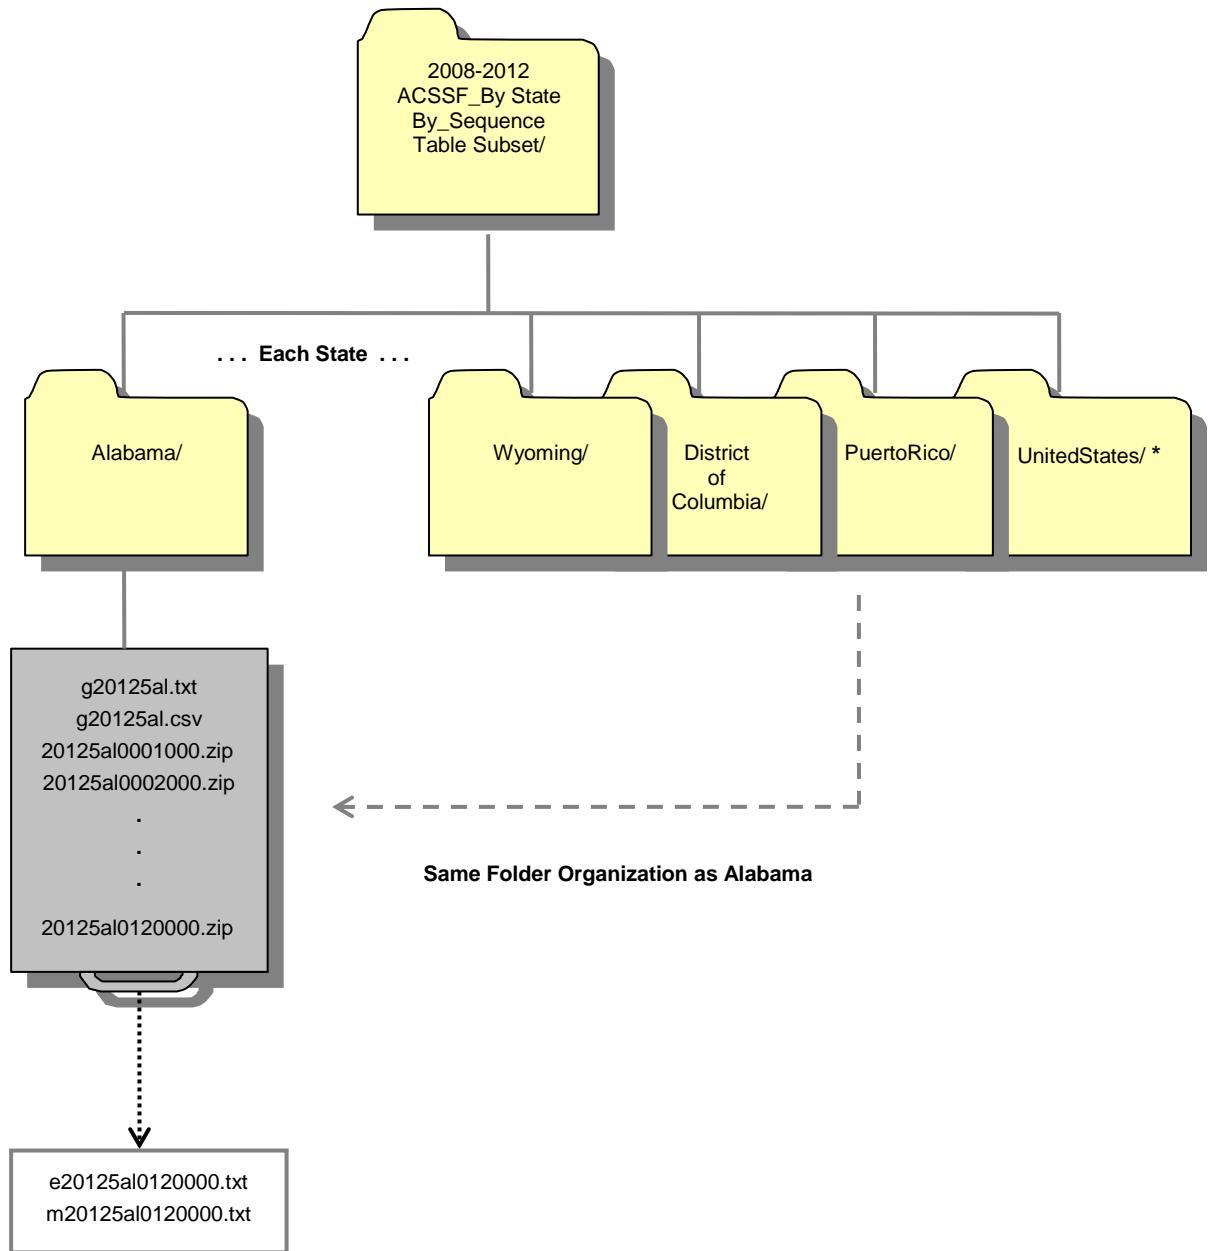

### B.1 2008-2012 ACSSF All In 1 Giant File (Experienced-Users-Only)

## B.2 2008-2012 ACSSF By State All Tables

### B.3 2008-2012 ACSSF By State By Sequence Table Subset

\* The United States folder contains tables for summary levels that cross state boundaries, such as the nation, regions, divisions, metropolitan statistical areas and tribal reservations. It does not contain tables for geographies that are entirely within a state, such as counties and places; for those tables, go to the folder for that state.

## Appendix C: User Notes

---

### C.1 Population Thresholds

The Census Bureau publishes data for 1-year, 3-year, and 5-year estimates, with population thresholds set for the 1-year and 3-year estimates to produce reliable data. Here is a brief comparison of the three types of estimates:

1-year Estimates	3-Year Estimates	5-Year Estimates
<ul style="list-style-type: none"> <li>Published for selected geographic areas with populations of 65,000 or greater</li> <li>Represent the average characteristics over a calendar year</li> <li>Have fewer published geographic areas than the 3-year and 5-year estimates</li> </ul>	<ul style="list-style-type: none"> <li>Published for selected geographic areas with populations of 20,000 or greater</li> <li>Represent the average characteristics over the 3-year period of time</li> <li>Have more published geographic areas than the 1-year estimates but fewer than the 5-year estimates</li> </ul>	<ul style="list-style-type: none"> <li>Published for all geographic areas including those with a population under 20,000.</li> <li>Represent the average characteristics over the 5-year period of time</li> <li>Have more published areas than the 1-year and 3-year estimates</li> </ul>

For more information on the ACS estimates, users are encouraged to visit the ACS website [www.census.gov/acs/www/guidance\\_for\\_data\\_users/estimates/](http://www.census.gov/acs/www/guidance_for_data_users/estimates/).

### C.2 Geography Restrictions

For data quality and geographic reasons, some tables are published with specific geography restrictions. For example, the table B05001-PR, Citizenship Status in Puerto Rico, is produced for Puerto Rico only, and the table B08501, Means Of Transportation To Work By Age For Workplace Geography, is only produced for the work place geographies. [Appendix E](#) has a complete list of tables and their geography restrictions, and [Appendix F](#) has a complete list of ACS 3-year published summary levels and components. Other examples include the quality measures tables (the B98 series) and detailed occupation tables.

### C.3 Jam Values

Some data values represent unique situations where either the information to be conveyed is an explanation for the absence of data, represented by a symbol in the data display, such as "(X)", or the information to be conveyed is an open-ended distribution, such as 115 or greater, represented by 115+.

The following special data values can appear in the ACS Summary File table as an explanation for the absence of data:

- Missing Value = “”

A missing string indicates that the estimate is unavailable. (This appears in the estimates and margins or error files as two commas adjacent to each other without anything between them, or if the last cell in a data file is filtered then you get a comma followed immediately by a carriage return or EOF.) A missing value indicates when an estimate is missing because of filtering for geographic restrictions, coefficients of variations (CV), or was removed due to the Disclosure Review Board’s (DRB) requirements. For more detail on filtering, please see [Appendix C.5](#).

- Dot = “.”

A dot indicates when the estimate has no sample observations or too few sample observations. In the margin of error files, this value could also indicate that the margin of error is unavailable for a median estimate that has been replaced with a jam value.

- Zero = “0”

A “0” entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate. This is similar to the “\*\*\*\*\*” symbol used in American FactFinder.

- Negative 1 = “-1”

This indicates that an estimate does not contain a Margin of Error. Tables B00001, B00002, and tables starting with B98 and B99 do not have margin of error (MOE) associated with them. The MOE calculations are set to -1 for these tables.

- Jam Values for Medians

The following is a listing of the jam values for medians. For example, if there is an estimate of "2499" for table B10010, then it does not indicate a dollar amount. It means that the median is somewhere below 2,500 and thus isn't calculated.

<b>Jam Value</b>	<b>Actual Meaning</b>	<b>Use for Medians</b>
0	1 or less	Age, Duration of Marriage
9	9.0 or more	Rooms
10	10.0 or less	Gross Rent as Percentage of Income, Owner Costs as Percentage of Income
50	50.0 or more	Gross Rent as Percentage of Income, Owner Costs as Percentage of Income
99	100 or less	Rent, Gross Rent, Selected Monthly Owner Costs, Monthly Housing Costs
101	101 or more	Duration of Marriage
116	115 or more	Age
199	200 or less	Tax
1001	1,000 or more	Selected Monthly Owner Costs
1939	1939 or earlier	Year Built
1969	1969 or earlier	Year Moved In
2001	2,000 or more	Rent, Gross Rent
2005	2005 or later	Year Built, Year Moved In
2499	2,500 or less	Income, Earnings
4001	4,000 or more	Selected Monthly Owner Costs, Monthly Housing Costs
9999	10,000 or less	Value
10001	10,000 or more	Tax
200001	200,000 or more	Income
250001	250,000 or more	Income, Earnings
1000001	1,000,000 or more	Value

#### **C.4 Rounding Rules and Margins of Error**

B00001, B00002, B98001, and B98002 are sample counts, not estimates, and do not have margin of error (MOE) associated with them. Tables in series B99\* imputation tables and B98\* (except B98001 and B98002) quality measure tables do not provide margin of error calculations. The margin of error calculations are set to -1 for these tables.

There are a few special rules on how certain margin of error are determined for ACS estimates. The accuracy of the estimate (decimal place) within the detailed tables determines how many digits the margin of error is rounded.

## C.5 Data Release Filtering Rules

Filtering rules, based on statistical reliability of the ACS 1-Year and 3-Year survey estimates, are used because certain geographic areas contain detailed tables include estimates whose level of reliability is unacceptable. The data release rules for the American Community Survey data tables include the following.

Every base table consists of a series of estimates. If more than half the estimates are not statistically different from 0 (at a 90 percent confidence level), then the table fails. Each estimate is subject to sampling variability that is summarized by its standard error. Dividing the standard error by the estimate yields the coefficient of variation (CV) for each of the estimates. (If the estimate is 0, a CV of 100 percent is assigned.) To implement this requirement for each table at a given geographic area, CVs are calculated for each of the table's estimates, and the median CV value is determined. If the median CV value for the table is less than or equal to 61 percent, the table passes for that geographic area; if it is greater than 61 percent, the table fails. Tables that are too sparse will fail this test. In that case, the table will not be published for that geographic area. Whenever a table fails, a simpler table that collapses some of the detailed lines together can be substituted for the original, more detailed table. The rules are then applied to the simpler table. If it passes, the simpler table is released. If it fails, none of the estimates for that particular table is released for this geographic area. These rules are applied to single-year period estimates and multi-year period estimates based on three years of sample data. Data release filtering rules do not apply to the ACS 5-Year survey estimates.

## C.6 Display of Estimates

The estimates in the summary files are stored using standard notation instead of in scientific notation. The estimates are stored as whole numbers. The largest estimate in a Summary File contains 14 digits.

## C.7 Multiple Sequences For a Table

There are eight tables with more than the maximum 245 cells that cannot fit into a single sequence, so each of these tables is broken into multiple sequence files. The table below shows the tables that contain multiple sequences:

Tables That Are Contained in More Than One Sequence File

Table ID	Table Title	Sequences
B24121	Detailed Occupation By Median Earnings In The Past 12 Months For The Full-Time, Year-Round Civilian Employed Population 16 Years And Over	84,85,86
B24122	Detailed Occupation By Median Earnings In The Past 12 Months For The Full-Time, Year-Round Civilian Employed Male Population 16 Years And Over	87,88,89
B24123	Detailed Occupation For The Full-Time, Year Round Civilian Employed Population 16 Years And Over	90,91,92

Table ID	Table Title	Sequences
B24124	Detailed Occupation For The Full-Time, Year Round Civilian Employed Male Population 16 Years And Over	93,94,95
B24125	Detailed Occupation For The Full-Time, Year Round Civilian Employed Male Population 16 Years And Over	96,97,98
B24126	Detailed Occupation For The Full-Time, Year Round Civilian Employed Female Population 16 Years And Over	99,100,101

The last six tables on the list are only produced at the United States national level (summary level 010), and the files for these sequences will be blank for all other summary levels.

## C.8 Explanation of Missing Estimates

Data users often question why certain American Community Survey (ACS) estimates are not available. Missing estimates can be caused by data suppression through various methods or restrictions that are applied to ACS data to limit the disclosure of information about individual respondents and to reduce estimates with unacceptable statistical reliability. The factors contributing to the data suppression include:

- Population thresholds (more information in section C1)
- Geographic restrictions for tables (more information in section C2)
- Data quality filtering (more information in section C5)
- Collapsed tables: ACS produces and releases two types of Detailed Tables, base tables and collapsed tables. The collapsed tables were introduced in an attempt to release more data to the public because many of the corresponding base tables were failing data quality filtering. Users may see the collapsed tables without counterpart detailed tables.
- DRB rules: Disclosure Review Board (DRB) establishes additional rules that specify what ACS data are released to ensure that the confidentiality of the individual's data are protected.
- Table cells and table topic restrictions: Table with more than 100 independent cells or tables with sensitive topics that could lead to disclosure risks are not allowed at the block group level.
- Table suppression for specific geographies: During the data review period, subject matter analysts may identify errors in microdata which occurred during data collection or early data processing and impacted tables and associated geographic areas. To avoid releasing unreliable estimates, one method used is to suppress tables for affected geographic areas at the last stage of the dissemination from being released to the public. Table suppression is documented in errata notes on the ACS Website on:

[http://www.census.gov/acs/www/data\\_documentation/errata/](http://www.census.gov/acs/www/data_documentation/errata/)

Additional information concerning data suppression is available on the ACS website on:

<http://www.census.gov/acs/www/>.

## Appendix D: Examples

---

### D.1 Creating a Table

The following 2005-2009 5-year Summary File example is also applicable to this 5-year Summary File. Let's say that you want to create Table B08406, "Sex of Workers by Means of Transportation to Work for Workplace Geography," for the state of Alaska. Which files do you need? How do you read the files?

You will need files from [www2.census.gov/acs2009\\_5yr/summaryfile/](http://www2.census.gov/acs2009_5yr/summaryfile/)

- 1) The `Sequence_Number_and_Table_Number_Lookup.xls` spreadsheet
- 2) The zipped file `20095ak0003000.zip` containing the estimate file `e20095ak0003000.txt`, the margin of error file `m20095ak0003000.txt`, and the geography file `g20095ak.txt`. All these data files are in folder `2005-2009_ACSSF_By_State_All_Tables`

Start with the `Sequence_Number_and_Table_Number_Lookup.xls` spreadsheet. Under the "Tblid" column, look for the value "B08406". You will see that the "Sequence Number" is 3 which for us means "0003." This means that the estimates you are looking for are in the data file "e20095ak0003000.txt". How do you know this is the right file? You know this from the name of the file: the "e" stands for estimate, "2009" is the year, "5" means that these are 5-year estimates, "ak" is the state (Alaska), and "0003" is the sequence number (which contains the data for Table B08406). Likewise, you need the "m20095ak0003000.txt" file for the margins of error.

Next click on the folder `2005-2009_ACSSF_By_State_All_Tables`. Then click on the file `Alaska_All_Geographies_Not_Tracts_Block_Groups.zip` and extract the files `e20095ak0003000.txt`, `m20095ak0003000.txt`, and `g20095ak.txt`

When you open the estimate file, `e20095ak0003000.txt`, you will see the following comma-delimited fields on the first line:

```
ACSSF,2009e5,ak,000,0003,0000001,333471,266201,220762,45439,36132,5602,3705,...
```

The first six fields – from "ACSSF" to "0000001" – are identifiers:

- 1) The first field tells you that this is an ACS Summary File
- 2) The second tells you that these data are five-year estimates for the year 2005-2009 (notice the "e" before "2009" and the "5" at the end)
- 3) The third tells you the state, e.g., "ak" is Alaska
- 4) The fourth is an iteration number 000
- 5) The fifth is the sequence number 0003
- 6) The last is a logical record code LOGRECNO 0000001. Use LOGRECNO to determine the geographic area within a state.

These six identifiers begin each new line in the estimate file, and the same holds true for the margin of error files. You can compare these identifiers with those in the respective margin of error file, m20095ak0003000.txt.

Then use the geography file for Alaska to determine the location within the state to which the data refer. The appropriate file is g20095ak.txt, where “g” stands for geography, “2009” is the year, “5” is the period estimate (in this case, 5-year estimate), and “ak” is the state. The geography file, g20095ak.txt, defines the LOGRECNO. Each LOGRECNO in this file specifies a geographic area pertaining to the state. For example, a LOGRECNO of “0000001” means the state of Alaska; a LOGRECNO of “0000002” means just the urban areas in Alaska; a LOGRECNO of “0000003” refers to just rural areas in Alaska. (Each state geography file also contains the lower-case FIPS State Code.) Please be aware that each state has its own geography file. For more information, see Chapter 2.4.

Glancing back at the Sequence Number and Table Number Lookup file, you will see that Table B08406 in sequence “0003” begins at the seventh position. From this point forward, for 51 fields (indicated on the same file), each field corresponds to the value of a “line number” in the table. So, field number seven, the 333471 value, corresponds to line number one, which is “Total”. Field number eight, the 266201 value, refers to line number two, which is “Car, Truck, or Van.” Field number nine, the 220762 value, corresponds to line number three, which is “Drove alone.” This continues all the way up to line number 51, at which point Table B08406 ends.

Were you to read all these files into a computer program using software such as SAS, you could translate the first nine fields of e20095ak0003000.txt as follows:

**TABLE B08406: SEX OF WORKERS BY MEANS OF TRANSPORTATION TO WORK FOR WORKPLACE GEOGRAPHY**

FILEID	FILE TYPE	STUSAB	CHARITER	SEQUENCE	LOGRECNO	Total	Car, Truck, or Van	Drove Alone
ACSSF	2009e5	ak	000	0003	0000001	333471	266201	220762
ACSSF	2009e5	ak	000	0003	0000013	2440	340	252
ACSSF	2009e5	ak	000	0003	0000014	5266	1046	620
ACSSF	2009e5	ak	000	0003	0000015	151263	135626	114936
ACSSF	2009e5	ak	000	0003	0000016	6421	2455	1586

Merging the geography file, the table shell, and the estimate and margin of error files together creates an excerpt of Table B08406, shown below:

Table ID	Line Number	Sequence Number	Table Title	Estimates	Margin of Error
B08406		003	<b>SEX OF WORKERS BY MEANS OF TRANSPORTATION TO WORK FOR WORKPLACE GEOGRAPHY</b>		
B08406		003	Universe: Workers 16 years and over		
B08406	1	003	Total:	333,471	+/-2,630
B08406	2	003	Car, truck, or van:	266,201	+/-2,589

B08406	3	003	Drove alone	220,762	+/-2,439
B08406	4	003	Carpooled:	45,439	+/-1,795
B08406	5	003	In 2-person carpool	36,132	+/-1,596

## D.2 Creating a Table Using SAS

Here is an example of how to access the Summary Files for one table for all geographies from the ACS summary file. The following 2005-2009 5-year Summary File example is also applicable to this 5-year Summary File.

Question: I am interested in downloading table B01001 for all published ACS geographies, how would I do this?

- 1) Go to the Sequence Number and Detailed Table Number Lookup File ([Chapter 2.3](#)) to locate sequence number for table B01001. There are Excel and SAS dataset versions of the file. They are available at [www2.census.gov/acs2009\\_5yr/summaryfile](http://www2.census.gov/acs2009_5yr/summaryfile)
- 2) Use SF\_All\_Macro.sas in [www2.census.gov/acs2009\\_5yr/summaryfile/UserTools/](http://www2.census.gov/acs2009_5yr/summaryfile/UserTools/) to run macros. Run the macro:

```
%TableShell(B01001);
```

This macro will provide metadata information on a given table, in this case B01001.

- 3) The following SAS dataset will be created with information about table B01001:

Table ID	Sequence Number	Line Number	Start Position	Total Cells in Table	Total Cells in Sequence	Table Title
B01001	0013		7	49 CELLS		SEX BY AGE
B01001	0013					Universe: Total population
B01001	0013	1				Total:
B01001	0013	2				Male:
B01001	0013	3				Under 5 years
B01001	0013	47				75 to 79 years
B01001	0013	48				80 to 84 years
B01001	0013	49				85 years and over

We can see that table B01001 is located in Sequence 0013; this applies to all published geographies.

- 4) We can read into SAS all tables in the 0013 sequence by running macro:

```
%CallSt;
```

This macro will run a do loop creating State two-digit abbreviations, which will allow a simple way to read the Summary Files into SAS for all geographies. Each time a valid two digit state abbreviation is created, the macro **%ALLSeqs** is run with the two digit state abbreviation.

The **%ALLSeqs** macro performs the following tasks:

- A. Read the geographic header file - **%AnyGeo** macro.
- B. There is a do loop to allow you to choose which sequences you would like to read in for example if you wanted sequence 0010 set the loop to be `do x=13 %to 13;` - The 0 values will be filled in.
- C. Within the do loop the following macros will be executed:
  - a. **%TablesBySeq;** -- This macro will give information about the whole 0003 sequence, not just table B01001.
  - b. **%ReadDataFile** - This macro is called two times once for each type of estimate. This macro will generate and run SAS code for each sequence specified in the do loop in step 2 and for each geography specified in the **%callst** macro.
  - c. Lastly, there is a merge statement that will merge together each of the three types of estimates and the geography header file by sequence number per geography.

5) You now will have all tables in the 0013 sequence read into SAS in the following dataset names, if the code is not modified, in the work directory Sf0013<st two-digit abbrev>.sas7bdat.

## Appendix E: Detailed Tables for the 2008-2012 ACS 5-year Estimates

Table Number	Table Title	Table Restrictions for All Geographies Except Block Groups	Table Available for Block Groups on Summary File?	Summary File Sequence Number	Summary File Starting and Ending Positions
B00001	Unweighted Sample Count Of The Population		Yes	1	7-7
B00002	Unweighted Sample Housing Units		Yes	1	8-8
B01001	Sex By Age		Yes	2	7-55
B01001A	Sex By Age (White Alone)			2	56-86
B01001B	Sex By Age (Black Or African American Alone)			2	87-117
B01001C	Sex By Age (American Indian And Alaska Native Alone)			2	118-148
B01001D	Sex By Age (Asian Alone)			2	149-179
B01001E	Sex By Age (Native Hawaiian And Other Pacific Islander Alone)			2	180-210
B01001F	Sex By Age (Some Other Race Alone)			2	211-241
B01001G	Sex By Age (Two Or More Races)			3	7-37
B01001H	Sex By Age (White Alone, Not Hispanic Or Latino)			3	38-68
B01001I	Sex By Age (Hispanic Or Latino)			3	69-99
B01002	Median Age By Sex		Yes	3	100-102
B01002A	Median Age By Sex (White Alone)		Yes	3	103-105
B01002B	Median Age By Sex (Black Or African American Alone)		Yes	3	106-108
B01002C	Median Age By Sex (American Indian And Alaska Native)		Yes	3	109-111
B01002D	Median Age By Sex (Asian Alone)		Yes	3	112-114
B01002E	Median Age By Sex (Native Hawaiian And Other Pacific Islander Alone)		Yes	3	115-117
B01002F	Median Age By Sex (Some Other Race Alone)		Yes	3	118-120
B01002G	Median Age By Sex (Two Or More Races)		Yes	3	121-123
B01002H	Median Age By Sex (White Alone, Not Hispanic Or Latino)		Yes	3	124-126
B01002I	Median Age By Sex (Hispanic Or Latino)		Yes	3	127-129
B01003	Total Population		Yes	3	130-130
B02001	Race		Yes	4	7-16
B02005	American Indian And Alaska Native Alone For Selected Tribal Groupings			4	17-62
B02006	Asian Alone By Selected Groups			4	63-81
B02007	Native Hawaiian And Other Pacific Islander Alone By Selected Groups			4	82-96
B02008	White Alone Or In Combination With One Or More Other Races		Yes	4	97-97
B02009	Black Or African American Alone Or In Combination With One Or More Other Races		Yes	4	98-98
B02010	American Indian And Alaska Native Alone Or In Combination With One Or More Other Races		Yes	4	99-99
B02011	Asian Alone Or In Combination With One Or More Other Races		Yes	4	100-100
B02012	Native Hawaiian And Other Pacific Islander Alone Or In Combination With One Or More Other Races		Yes	4	101-101

2008-2012 ACS 5-Year Summary File Technical Documentation

B02013	Some Other Race Alone Or In Combination With One Or More Other Races		Yes	4	102-102
C02003	Detailed Race		Yes	4	103-121
B03001	Hispanic Or Latino Origin By Specific Origin			5	7-37
B03002	Hispanic Or Latino Origin By Race		Yes	5	38-58
B03003	Hispanic Or Latino Origin		Yes	5	59-61
B04001	First Ancestry Reported			6	7-115
B04002	Second Ancestry Reported			6	116-224
B04003	Total Ancestry Reported			7	7-114
B04004	People Reporting Single Ancestry			7	115-222
B04005	People Reporting Multiple Ancestry			8	7-114
B04006	People Reporting Ancestry			8	115-223
B04007	Ancestry			8	224-230
B05001	Nativity And Citizenship Status In The United States	US Only		9	7-12
B05001PR	Nativity And Citizenship Status In Puerto Rico	PR Only		9	13-18
B05002	Place Of Birth By Nativity And Citizenship Status			9	19-33
B05003	Sex By Age By Nativity And Citizenship Status			9	34-56
B05003A	Sex By Age By Nativity And Citizenship Status (White Alone)			9	57-79
B05003B	Sex By Age By Nativity And Citizenship Status (Black Or African American Alone)			9	80-102
B05003C	Sex By Age By Nativity And Citizenship Status (American Indian And Alaska Native Alone)			9	103-125
B05003D	Sex By Age By Nativity And Citizenship Status (Asian Alone)			9	126-148
B05003E	Sex By Age By Nativity And Citizenship Status (Native Hawaiian And Other Pacific Islander Alone)			9	149-171
B05003F	Sex By Age By Nativity And Citizenship Status (Some Other Race Alone)			9	172-194
B05003G	Sex By Age By Nativity And Citizenship Status (Two Or More Races)			9	195-217
B05003H	Sex By Age By Nativity And Citizenship Status (White Alone, Not Hispanic Or Latino)			9	218-240
B05003I	Sex By Age By Nativity And Citizenship Status (Hispanic Or Latino)			10	7-29
B05004	Median Age By Nativity And Citizenship Status By Sex			10	30-44
B05005	Year Of Entry By Nativity And Citizenship Status In The United States	US Only		10	45-65
B05005PR	Year Of Entry By Nativity And Citizenship Status In Puerto Rico	PR Only		10	66-86
B05006	Place Of Birth For The Foreign-Born Population In The United States	US Only		10	87-246
B05006PR	Place Of Birth For The Foreign-Born Population In Puerto Rico	PR Only		11	7-52
B05007	Place Of Birth By Year Of Entry By Citizenship Status For The Foreign-Born Population			11	53-146
B05008	Sex By Place Of Birth By Year Of Entry For The Foreign-Born Population			11	147-215
B05009	Age And Nativity Of Own Children Under 18 Years In Families And Subfamilies By Number And Nativity Of Parents			12	7-43
B05010	Ratio Of Income To Poverty Level In The Past 12 Months By Nativity Of Children Under 18 Years In Families And Subfamilies By Living Arrangements And Nativity Of Parents			12	44-68
B05011	Period Of Naturalization			12	69-79
B05012	Nativity In The United States	US Only		12	80-82
B05012PR	Nativity In Puerto Rico	PR Only		12	83-85
B06001	Place Of Birth By Age In The United States	US Only		13	7-66
B06001PR	Place Of Birth By Age In Puerto Rico	PR Only		13	67-126

2008-2012 ACS 5-Year Summary File Technical Documentation

B06002	Median Age By Place Of Birth In The United States	US Only		13	127-131
B06002PR	Median Age By Place Of Birth In Puerto Rico	PR Only		13	132-136
B06003	Place Of Birth By Sex In The United States	US Only		13	137-151
B06003PR	Place Of Birth By Sex In Puerto Rico	PR Only		13	152-166
B06004A	Place Of Birth (White Alone) In The United States	US Only		13	167-171
