

ACKNOWLEDGMENTS: The files contain some basic information from 1850 to 1950 taken from ICPSR Study Number 0003. Some additional information for 1950 & for the files 1954 to 1974 were taken from various digitized files that were done by the United States Bureau of the Census & the United States Department of Agriculture. The files from 1978 to 1997 are from the CD-Rom's provided by the Bureau of the Census. The files for 2002 & 2007 are from CD-ROM's from the U.S. Department of Agriculture. The remaining information for each census were entered directly from the published volumes. Some of the information for 1840-1860 & 1880 was furnished by Lee A. Craig (Dept. of Economics, North Carolina State University) & Thomas Weiss (Dept. of Economics, University of Kansas). The price & output data for 1840-1860 were calculated by Lee Craig. Some variables were taken from ICPSR #0003.

NOTE: For 1840, variables 40-88 (prices and value of output) were calculated. Similarly, for 1850 variables 51-116 (prices and value of output) and for 1860 variables 53-121 (prices and value of output) were also calculated.

The present data sets were compiled & corrected by Michael R. Haines (Dept. of Economics, Colgate University), Price Fishback (Department of Economics, University of Arizona; & Paul Rhode, (Department of Economics, University of Michigan). The authors wish to thank Colgate University (the Banfi Vintners Professor research account & other research funds) & the Universities of Arizona & Michigan for providing student research assistants. They also wish to acknowledge the support of the National Science Foundation (NSF Grant NSF-SES-0921732 "The Dramatic Rise in Agricultural Productivity in the U.S from 1910 to 1950: Disentangling the Roles of Technological Change, Government Policy, & Climate". NSF Grant 0648045 "The National Historical Geographic Information System") & the National Institutes of Health (R01 HD057929 "Integrated Spatio-Temporal Aggregate Data Series: Print Conversion & Vital Statistics").

DESCRIPTION: This set of files provides complete published county level data from the United States Censuses of Agriculture for 1840 to 1945 & from 1969 to 2007. It also includes the state & national totals for the variables included. All variables at the county level were taken up through 1925. Thereafter, some data were omitted. Further censuses will be added. Please note that most of the basic crop output data apply to the previous harvest year. Since the censuses were taken in June, this means 1839, 1849, 1859, 1869, 1879, 1889, 1899 etc. Only after 1880 was a distinction made as to time period in the published data. The stock variables, such as value of farms, numbers of livestock, & acreage, apply to the time of the census. The file also includes partial data from the agriculture censuses of 1950 to 1964. For 1930, 1940, & 1945, the data by type of farm were not coded. In some cases, variables that were not available in a particular census were published in subsequent censuses.

Certain basic things were done to the data. First, all the data were checked for adding up. That is, counties should total up to states & states should total up to the United States total, whenever counts were involved. Second, some regular extra variables were added, including the county & state FIPS codes, codes for census region, & a variable "level" (1=county 2=state 3=USA) to allow for selection. Third, for 1840-1860, some additional variables were created. These involved the inclusion of prices (by state) for various commodities, the multiplication of the physical quantities by those prices to obtain value of output of those commodities, & the summing of various values to obtain different measures of the value of agricultural output. This was not done for 1870 & subsequent censuses.

The format of the present set of files is STATA SE versions 10.0-12.0. What follows here is simply a listing of the variables & their labels using the STATA "describe" command. The STATA files may be readily converted into other formats with such programs as StatTransfer. The county files are labeled ag???co.dta, where "???" represents the last three digits of the census year, e.g., "840" represents 1840. More complete information for many of the variables may be found in the original census volumes.

Variables 1571-1577

Source: U.S. Bureau of the Census, Sixteenth Decennial Census of the United States, 1940. Agriculture. "Cash Rent Paid or Payable by Cash Tenants & by Part Owners Renting on a Cash Basis." (Washington, D.C. 1944), Table 10.

Variables 1600-1629

The 1940 census had suppression of cells with fewer than three farms, except the cells for number of farms. It was possible to fill in some of these cells with data provided from the 1945 Census of Agriculture. It was also possible to use formulas to calculate sums of rows & columns in the tables to get missing cell values. Finally, in a few cases, estimates were made. Consequently, there will be empty cells where data clearly should be present.

Type of Farming Area Codes (var1576):

Generalized type-of-farming areas in the United States as delineated by the Department of Agriculture in cooperation with various local groups familiar with farming in particular areas are presented in this column. Further discussion of this regionalization is presented in the definitions & sources in this book & in Generalized Types of Farming in the United States, Jan. 1946, prepared by the Department of Agriculture, Bureau of Agricultural Economics.

In presenting these type-of-farming areas, the Department of Agriculture has used a designation which consisted of a Roman numeral, a letter & an Arabic numeral. The code presented here is a three-digit numerical code since such a code is better for punch card use. The code used in Col. 63 is presented in the first column below, the Department of Agriculture code in the second column, & the title assigned to the area indicating the predominant type of farming in that general area in the third column.

Variables 2000-2010, 2011-2013, 2015-2016, 2018-2071, 2073-2075, 2080-2081, 2090, 2097, 2108-2109, 2112,2114, 2117, 2125-2128-2155-2234: County Tables XVI-XVIII.

Source: U.S. Bureau of the Census, United States Census of Agriculture: 1945. Vol I. "Statics for Counties." (Washington, DC: G.P.O, 1947). County Tables II (Parts 1-3), III, & IV.

Variables: all remaining variables, including 2235-2263 from Table IV.

The 1940 census had suppression of cells with fewer than three farms, except the cells for number of farms. It was possible to fill in some of these cells with data provided from the 1945 Census of Agriculture. It was also possible to use formulas to calculate sums of rows & columns in the tables to get missing cell values. Finally, in a few cases, estimates were made. Consequently, there will be empty cells where data clearly should be present.

1978 DATA SET (County & State)

FILE: ag78cos.ver1987.dta

A version of this file ag78cos.ver1987_missing.dta converts cells to missing (". " in Stata) where the flags indicate that. The original file had those cells as zero.

Another version of this file ag78cos.ver1987_missing_corrected.dta corrects for an error discovered in the original data files. The numbers for item05037 " Cropland, only pasture or grazing (acres)" were interchanged among the 1978, 1982, & 1984 files. This was corrected.

Flag codes: 0 = no special conditions associated with this data cell
1 = data not available (NA)
2 = data not available (X)
3 = less than half or the unit reported (Z)
4 = data withheld to avoid disclosing information for individual farms (D)
5 = data not published for this State/county (because it contains fewer than 10 farms or no farms) (NA)
6 = data not available due to brackets (NA)
