Acknowledgement of Assistance

All manuscripts utilizing data made available through the Consortium should acknowledge that fact as well as identify the original collector of the data. The ICPSR Council urges all users of the ICPSR Data facilities to follow some adaptation of this statement with the parentheses indicating items to be filled in appropriately or deleted by the individual user.

The data (and tabulations) utilized in this (publication) were made available (in part) by the Inter-university Consortium for Political and Social Research. The data for CENSUS OF POPULATION AND HOUSING, 1980 [UNITED STATES]: COUNTY MIGRATION BY SELECTED CHARACTERISTICS, 1975-1980 were originally collected by the U.S. Department of Commerce, Bureau of the Census. Neither the collectors of the original data nor the Consortium bear any responsibility for the analyses or interpretations presented here.

In order to provide funding agencies with essential information about the use of archival resources and to facilitate the exchange of information about ICPSR participants' research activities, each user of the ICPSR data facilities is expected to send two copies of each completed manuscript or thesis abstract to the Consortium. Please indicate in the cover letter which data were used.

U.S. Dept. of Commerce. Bureau of the Census
CENSUS OF POPULATION AND HOUSING, 1980 [UNITED STATES]: COUNTY
MIGRATION BY SELECTED CHARACTERISTICS, 1975-1980 (ICPSR 8471)

SUMMARY = Gross in- and out-migration statistics are provided in this file for each county (or county equivalent) in the United States. Migrant data are stratified by age, race, and sex. Included for each race/sex/age group are data on college attendance, military status, group quarters status, and residence abroad in 1975. Data on country of birth are listed for race/sex strata. Sample populations are also provided.

UNIVERSE = All persons in the United States.

SAMPLING = Migration data were derived from information on residence in 1975 and 1980 provided on the 1980 Census questionnaire. Population and residence data for 1975 are based on approximately one-half of the full census sample.

DATA FORMAT = LRECL

TECH NOTE = The in- and out-migration data for each county are presented in the form of two "tables." Table 1 contains 48 cells of seven characters each, and Table 2 contains 1,296 cells of six characters each.

CLASS = IV

EXTENT/COLLECTION = 1 data file

TECHNICAL DOCUMENTATION

This documentation consists of the following materials:

Attachment 1	Abstract
Attachment 2	Data Dictionary
Attachment 3	Definitions and Special Characteristics
Attachment 4	FIPS State and County Codes

NOTE

Questions about the documentation should be directed to Data User Services Division, Data Access and Use Staff, Bureau of the Census, Washington, D.C. 20233. Phone: (301) 763-2074.

Questions about the tape should be directed to Data User Services Division, Customer Services (Tapes), Bureau of the Census, Washington, D.C. 20233. Phone: (301) 763-4100.

Questions about the subject matter should be directed to Richard Irwin, Population Division, Bureau of the Census, Washington, D.C. 20233. Phone: (301) 763-7883.

Attachment 1

Abstract

**Census of Population and Housing, 1980:
County Migration by Selected Characteristics,
1975-1980 [machine-readable data file] prepared
by the Bureau of the Census. --Washington: The
Bureau [producer and distributor], 1985.**

TYPE OF FILE:

Summary statistics.

UNIVERSE DESCRIPTION:

All persons in the United States.

SUBJECT-MATTER DESCRIPTION:

The file provides sample gross out- and in-migration data for each county by age (18 five-year groups), modified race (Total, White, Black), and sex. Detail is provided for persons in the Armed Forces and/or attending college, by group quarters status. The sample population by age, sex, and race is included. Also, in-migrants are tabulated by country of birth, sex, and race (3 categories).

GEOGRAPHIC COVERAGE:

One record for each of the 3,137 counties (and county equivalents) defined in the 1980 census.

TECHNICAL DESCRIPTION:

FILE STRUCTURE:

Rectangular.

FILE SIZE:

One file for the United States with 3,137 records. Record size is 8,160 characters.

FILE SORT SEQUENCE:

Records are presented in alphabetical order (FIPS code sequence) by county, within State.

REFERENCE MATERIALS:

"Census of Population and Housing, 1980: County Migration by Selected Characteristics, 1975-1980 Technical Documentation." The documentation includes this abstract, a record description, and a statement on definitions

and limitations. One copy accompanies each file order. It is available separately for \$5 from Customer Services.

RELATED MACHINE-READABLE DATA FILES:

Census of Population and Housing, 1980: County Population by Age, Sex, Race, and Spanish Origin (Preliminary OMB-Consistent Modified Race). Available on one reel at 6250 bpi for \$140 and three reels at 1600 bpi for \$420 from Data User Services Division, Customer Services (Tapes), Bureau of the Census, Washington, D.C. 20233.

FILE AVAILABILITY:

This file is available on one reel at 6250 bpi or 1600 bpi at a cost of \$140. Technical options are listed on the Customer Services order form on the following page.

Attachment 3

Definitions and Special Characteristics

Census of Population and Housing, 1980: County Migration by Selected Characteristics, 1975-1980

A. Introduction

This file presents data on in-migration and out-migration for counties between 1975 and 1980 developed by the Census Bureau specifically for use in its projects that require county migration data by age, sex, and race. The migrant data are sub-classified by military status and college attendance in 1975 and 1980, with additional detail for migrants in group quarters (barracks, dormitories, and institutions) in 1980, and ~~persons~~ ^{residence} abroad in 1975. The resident population derived from the sample data is also included, and an estimate of migration for the population under 5 years of age in 1980 was developed especially for this file. (See below, Special Limitations.)

B. Definitions

1. Residence in 1975. The data on residence in 1975 were derived from answers to question no. 15 on the 1980 Census of Population and Housing sample questionnaire which asked for the State (or foreign country), county, and city of residence on April 1, 1975. Residence in 1975 is used in conjunction with residence in 1980 to determine the mobility of the population between counties. When no information on residence in 1975 was collected for a person, information for other family members was used, if available. All cases of nonresponse or incomplete response not assigned based on information from other family members were allocated based on the previous residence of other persons with similar characteristics who provided complete information.

The category "in-migrant" (as defined for counties) is a person who moves to a specified county from a different county in the United States, or from abroad. An "out-migrant" for counties is a person who leaves a specified county and moves to a different county within the United States.

For more information on definitions, see U.S. Bureau of the Census, 1980 Census of Population, Supplementary Report PC80-S1-17, "Gross Migration for Counties: 1975 to 1980. For a detailed discussion of the accuracy of the data and other technical and procedural matters, see Appendix D of the 1980 Census of Population, General Social and Economic Characteristics, PC80-1C.

2. Armed Forces Status and College Attendance in 1975 and 1980. Sample question no. 17 in the 1980 Census asked all respondents "In April 1975 was this person - a. On active duty with the Armed Forces? b. Attending college? c. Working at a job or business?". The answers to these questions determined status in 1975. For the determination of status in 1980, Armed Forces was written in by the respondent in a question under "Current or most recent job activity"; and college attendance was established by questions on school enrollment and years of school completed. In cases of nonresponse in both 1975

and 1980, information was allocated based on answers to other questions and related characteristics. The data on Armed Forces status and college attendance in 1975 are shown only for persons 21 years of age and older in 1980, while the 1980 data are only for persons 16 and over.

Note that both in 1975 and 1980 a person could be both in the Armed Forces and attending college, so it is possible for the sum of these responses to be greater than the total number of migrants in the category.

4. Group Quarters. All persons not living in households are classified by the Bureau of the Census as living in group quarters. Two general classes of the group quarters population are recognized, inmates of institutions and all others. The category "other" includes military barracks, college dormitories, fraternities, and sororities, and certain other types of group living arrangements. For a detailed discussion see Appendix B. of the 1980 Census of Population, General Social and Economic Characteristics, PC80-1C.

5. Age, Sex, and Race. For general information on the determination of age, sex, and race, see the Supplementary Report PC80-S1-17 cited above. However, the data for the White population here differs substantially from that shown in the Supplementary Report. For this file, persons of Spanish origin who marked the category "Other" (race not specified) were transferred to White or Black according to the distribution of persons of the same Spanish origin (Mexican, Cuban, Puerto Rican, other Spanish) who originally did specify White or Black. The great majority were assigned to White. The "Other" category (unspecified) included a smaller number of persons not of Spanish origin, and this group was also reassigned to specified races. The modified race detail in this file matches the 1980 census county population data contained in a tape file previously prepared by the Census Bureau for general distribution.^{1/} The population and migration detail in these two files meets standards established by the Office of Management and Budget with respect to the classification of the population by race, and is consistent with vital statistics by race published by the National Center for Health Statistics.

6. Sample Universe. Data on population and residence in 1975 in this file are based on approximately one-half of the full census sample. Therefore, these population and migration tabulations may differ from tabulations based on the full sample. For example, the number of persons 5 years old and over derived from residence in 1975 tabulations may not agree with tabulations by age that are shown in other publications which are based on the full sample.

Since the data in this file are based on a sample, they are subject to sampling variability, that is, variation that occurred by chance because a sample rather than the entire population was surveyed. Sample variation is a serious limitation to the use of the data in this file, because the cross-classification by age, sex, and race produces many sub-categories which contain very few persons. If one of these persons falls in the sample, the weighting procedure can very easily produce more migrants than the total number of persons

^{1/} Census of Population and Housing, 1980: County Population by Age, Sex, Race, and Spanish Origin (Preliminary OMB-Consistent Modified Race) [machine-readable data file] / prepared by the Bureau of the Census. --Washington: The Bureau [producer and distributor], 1983.

in that category in the 100 percent counts (but not more than the sample population given in this file). If the migrant data are used in conjunction with 100 percent 1980 population data, some redistribution is mandatory for age-sex-race cells with low population. Even without the factor of sample variation, the user should also be aware that for small counties the population in individual age-sex-race cells is so small that a residential move by a few families can produce migration patterns that are very different from the norm for larger populations.

C. Residence Abroad in 1975 by Country of Birth

The file provides a separate matrix of information for in-migrants from abroad to each county by country of birth. For this purpose, the countries were classified into 7 groups, as shown in Attachment 2. The file provides detail by sex and race, but not by age. The groupings by country of birth were established to assist in adjusting the immigration component by race in each county for possible future shifts in the relative contribution of the various areas of the world to U.S. immigration.

D. Categories

The basic matrix of population and migrant data is for 18 five-year age groups from 0-4 to 85 years and over, by sex and race (All Races, White, and Black). The age-sex and other detail for White and Black is suppressed if the population of the race group in the county is from 1 to 29 persons. The total Black figures for population, in-migration, and out-migration are given. The detail by age, sex, and race is shown for 12 categories (11 migration categories by college, military, and group quarters status, plus sample county population). These categories are listed in Attachment 2. Note that the in-migrant category "attending college in 1980" includes those in the next category "attending college in 1980 and in group quarters". The two military in-migrant categories have a similar relationship, as do the two categories for "abroad in 1975". The sub-categories of in-migrants do not sum to the total in-migrants, and the same is true for out-migrants.

E. Special Limitations

The migration data for the age group under 5 years of age given in the file are synthetic estimates developed to provide full coverage of the population. Since these children were born after March 31, 1975, the census migration question provides no information for this group. Gross movement for states for this age group can be developed from the census question on state of birth, but county of birth is not asked.

In order to provide some indication of migration for the under 5 group, synthetic data were developed from the information on the census questionnaire during the preparation of this file of migrant data. Specifically, each individual under 5 years of age was assigned the migration information given for the first person preceding this individual on the census form who was 5 years of age or over. After tabulating this information exactly as though it were real migration information, the aggregate migration information for the under 5 group was divided by 2, and the result included in the file. The

division by 2 is based on the notion that the group under 5 have lived on the average 2 1/2 years, and are therefore exposed to only 1/2 of the "risk" of migrating that is experienced by older cohorts. Many factors influence the true difference, but in the absence of precise information about these factors, it seemed advisable to keep the adjustment simple. The user of the file can modify or ignore the synthetic migration detail for the youngest age group, according to the requirements of the specific project.

The assignment of migration to the youngest group using information for persons listed previously on the form is of course based on the expectation that this person is an older sibling or a parent. To the extent that this occurs, the assignment of migration to children under 5 for this file would be the migration experience of an older sibling or of the spouse. There is no assurance that this experience is the true experience of the child under 5, and it is easy to imagine situations where the preceding person on the form is not an older sibling or a parent. Nonetheless, the information may prove to be useful. It will certainly be much simpler to apply than alternative methods now available to generate similar figures.
